Prime-Index Mathematics, Generator of the Quran

After reading and studying these mathematical facts, the sincere reader will conclude that the Quran is the literal embodiment of the Prime-Index Mathematics and that it can only be authored by God alone.

The Quran, with its profound message of "There is no god but God", advocates worship of God alone. Therefore, the guarded tablet, as asserted by God in verse 85:22 of the Quran, is eternal even if the galaxies collide or the Multiverse expires. Hence, adding, damaging or burning the ink and paper version of the Quran, done by the ignorant, will not affect anything in the least.

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

In the name of God, the All Gracious, the All Merciful

54:1 - The Hour has come closer, and the moon was conquered.

54:2 - And when they saw proof, they turned away and said; this is continuous magic.

54:3 - And they rejected it and followed their desires. However, every matter has a place in time.

54:4 - And indeed, the news of what is to transpire has already come to them.

54:5 - Plenty of wisdom, but the warners had no effect.

54:6 - You shall therefore turn away from them, for the day will come when the caller announces a terrible announcement.

54:7 - With their eyes subdued, they will come out of their coffins like scattered locusts.

54:8 - They will rush towards the caller, and the unfaithful will say, this is a difficult day.

- **For completeness, we also look at 5:41.**

5:41 - O you messenger do not be saddened by those who race towards disbelief, these are amongst those who said, we believed as a lip service while there was no belief in their hearts, and as for some of those who were Judeans, they listened tirelessly to lies, they listened tirelessly to those people who did not respond to you. They take the word out of context. They say if you are given this then take it, however, if you are given anything else then beware. Furthermore, if God wills someone's downfall, then nothing can help him against God. These are the ones that God has not willed to cleanse their hearts. For them, there is humiliation in this world, and awaiting them in the Hereafter is a tremendous suffering.

The Study of Surahs 5 and 12

5/16/25

- **One of the most brutal and unjust punishments practiced in some Muslim countries is "cutting off the hand of the thief".**
- **The verse is 5:38.**
- **538th Non-Chen Prime is 9127.**
- **Let us look at the structure 5:38.**
- **5 is the number of times the name Muhammad has been mentioned in the Quran including the name of the Surah 47 which is Muhammad.**
- **Note Surah 47 has 38 verses.**
- **38 is also the sequential value of the word محمد (Muhammad)**
- **5:38 is explained in 12:31.**

  Here is 12:31. When she heard about their gossip, she sent for them and provided for them comfortable places and gave each one of them a knife and said, go to them. Once they saw him, they were so overwhelmed by him that they cut their hands and said, glory to God this is not a human being, this is an honorable angel.

- **Again "knives" and "hands". The same Arabic word is being used. Obviously, they could not "cut off" their hands!**
- **In 12:38, Joseph tells his prison mates about worshipping God alone.**
- **Here is 12:38 -- Instead, I follow the nation of my fathers Abraham, Isaac, and Jacob. We never set up anything as a partner for God. This is grace from God upon us and upon the people, but most people are not appreciative.**
- **Let us see how God inspires Muhammad to follow the Nation of Abraham".**
- **Here is 16:123 – Then, We inspired you to follow the Nation of Abraham, the monotheist, he was never one of those who set up partners for god.**
- **In this verse, "you" is Muhammad. This is because the verse number 123 is the 92nd Composite. Recall 92 is the numerical value of Muhammad Based on "ABGD" values, where Meem is has a value of 40, instead of its sequential value which is 13.**
- **Let us look at 1238. 1 is the index of the prime 2, 2 is the index of then prime 3, 3 is the index of the prime 5 and 8 is the index of the prime 19.**
- **$2 \times 3 \times 5 \times 19 = 570$**
- **570 is the frequency of Alif + Lam + Meem in Surah 32, called "The Prostration".**
- **570th Gaussian Prime is 9127.**
- **1238 is the 619th Even Number and 619 is 114th Prime.**

- **1238 is the 353rd Distinct Semiprime.**
- **353 is the Exponent of 19th Gaussian Mersenne Prime and it is also the frequency of HHa + Meem is surah 42.**
- **353rd Sphenic Number is 2278 and let us see what 22:78 says.**
- **22:78 -- And strive in the cause of God, a true strife. He has chosen you and has not put any hardship on you in practicing your religion. This is the Nation of your father Abraham. He called you Muslims previously and for the messenger to be a witness amongst you and you will be witnesses amongst the people. Therefore, observe the contact prayer and give the cleansing charity and hold on to God, He is your Lord, the best Lord and the best Supporter.**
- **Now let us see Joseph a follower of the Nation Abraham handles the case of "theft".**
- **12:76 -- They began to search their bags before his brother's bag, then, they discovered it in his brother's bag. We thus perfected Our plan for Joseph. He could not take custody of his brother according to the king's religion; it is only according to God's will. He raises whomever he wills in rank. And above every knowledgeable one, there is one who is more knowledgeable.**
- **After all, said and done, we reach the true meaning of 5:38.**
- **5:38 -- As for the thief, be it male or female, you shall take them into custody, as a requital for what they have earned, a deterrent punishment from God. And God is Almighty, All Wise**

- **4271 is the 16th permutation of 2147, the total frequency of HaMeem in all seven H.M.-initialed chapters 40-46.**
- **Let us look at the following table.**

Index	Prime	Composite
586	4271	714

- **There is an inherent relation between the prime and the composite in the above table.**

Index	Prime
4	7
2	3
7	17

1	2

$7 \times 3 \times 17 \times 2 = 714.$

Hence, these two numbers generate each other. Their common index is 586. However, we have,

$586 = 2 \times 293.$

2293 is the 341st Prime and $341 = 11 \times 31$ and 1131st Prime is 9127.

The index of 2 is 1 and the index of 293 is 62 so we have 162 which is the index of prime number 953 which happens to be the index of composite 1143.

$1143 = 9 \times 127.$

Recall from many moons ago that the TRUE position of the HaMeem of 42:1 is 4271.

8. **The 19th Permutation of 2346 is 6234, which is the total number of numbered verses in the Quran.**
9. **Important note: Although we have known about items 1 through 8 for many years the new findings of the 2719 Lonely Prime, 35951 and the fact that it is the 1730th Additive Prime, as well as its index of 1365 in the domain of Lonely Gaussian Primes, makes it possible to generate these facts with all the Hafs version of the Qurans in circulations. This is because additions of 9:128 and 9:129 will not change the count of the Prime Numbered verses in the Quran since neither 128 nor 129 is a Prime Number! A seen above, the generator reveals the fallacy of 9:128 and 9:129. Truth cannot be destroyed!**

- In mathematics, the **Ulam numbers** comprise an integer sequence devised by and named after Stanislaw Ulam, who introduced it in 1964. The standard Ulam sequence (the (1, 2)-Ulam sequence) starts with $U_1 = 1$ and $U_2 = 2$. Then for $n > 2$, U_n is defined to be the smallest integer that is the sum of two distinct earlier terms in exactly one way and larger than all earlier terms. (Wikipedia)

  Ulam Primes are simply the prime numbers of the Ulam Numbers. The first 19 Ulam Prime are:

  2, 3, 11, 13, 47, 53, 97, 131, 197, 241, 409, 431, 607, 673, 739, 751, 983, 991, 1103

- **The 19th Ulam Prime is 1103.**
- **1103 Sphenic Number is 6346 which is the number of verses in the Quran, including the 112 un-numbered opening statements** بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ
- **Recall the last Surah revealed was 110 and it has 3 verses.**
- **Hence, in the order of revelation 110 is the 114th revelation and 1143 = 9 × 127**
- **The 1103rd Additive Prime is 21143**
- **903rd Long Prime is 21143**
- **The 748th Composite is 903**
- **The 748th Lonely Prime is 9127.**
- **Surah 9 has 127 verses.**
- **903rd Prime is 7019.**
- **Recall 7019 is the 114th Index-Additive Prime.**

- **7019 is the numerical value of verse 9:127.**
- **21143 is the 1657th Lonely Prime**
- **$1657_{19} = 9127_{10}$**
- **Surah 9 has 127 verses.**

The 114th Ulam Prime

5/29/23

- **The 114th Ulam Prime is 13399.**
- **The 538th Lonely Gaussian Prime is 13399.**

- **According to the ordinal values of Arabic alphabet the value of the word محمد is 38. Recall Sura 47 has 38 verses. (Rashad Khalifa)**
- **4 is the number of times the word محمد is mentioned in the Quran.**
- **438th Composite is 538.**
- **It is noteworthy that 538 is also referred to as the frequency of the word محمد concatenated with its ordinal value if you decide to count the name of the Surah 47.**

The 19th Composite

5/22/23

- **The 19th Composite is 30.**
- **19 × 30 = 570**
- **570 Gaussian Prime is 9127. Note a Gaussian Prime is a Prime which is not factorizable in the complex domain.**
- **570th Lucky Prime is 36067.**
- **36067 is the 1930th Gaussian Prime.**
- **Note, 1930 is the concatenation of 19 and 30.**
- **36067 is the 1369th Lonely Gaussian Prime.**
- **1369th verse from the beginning of the Quran, including the un-numbered opening statements, is verse 9:127.**
- **Let us check verse 19:30.**

2278 1259 1297 504 1048(1600), 518(769) 114(153) 19:30	He said indeed I am a servant of God, He has given me the scripture, and has appointed me a prophet.

- Look at the numbers assigned to this verse.
- It is the 114th verse revealed which contains the word God.
- 1297 is the 114th Additive Prime. Recall the Quran has 114 Surahs.
- The 19th Permutation of 1297 is 9127 and Surah 9 has 127 verses.
- Sura 22 has 78 verses. 2278 is the 353rd Sphenic Number.
- 353 is the frequency of ح + م (Hha + Meem) in Sura 42.
- Note, 353 is the exponent of the 19th Gaussian Mersenne Prime.
- Now, look at verse 22:78.
- 22:78 -- And strive in the cause of God, a true struggle. He has chosen you and has not put any hardship on you

in practicing your religion. This is the Nation of your father Abraham. He called you Muslims previously and for the messenger to be a witness amongst you and you will be witnesses amongst the people. Therefore, observe the contact prayers and give the cleansing charity and hold on to God, He is your Lord, the best Lord, and the best Supporter.

The 19th Super Prime and the 19th Lucky Prime

5/15/23

- **The 19th Super Prime is 331.**
- **The 19th Lucky Prime is also 331!**
- **$19331 = 13 \times 1487$ is a Semiprime.**
- **The indices of these prime factors are 6 and 236.**
- **Concatenation of these two number yields 6236.**
- **Which is the number of verses if one includes 128 and 129 is Surah 9.**

- **40: 44 -- You will soon remember what I am telling you, and I leave my deed to God. Indeed, God is Seer of the servants.**
- **Read on and see what happens!**
- **19 × 331 = 6289**

- **Let us see what verse 2:79 says.**

- **Therefore, woe to those who write the scripture with their hand and say this is from God in order to obtain a cheap material gain. Woe to them for what they wrote and woe to them for what they gained.**
- **Note, 279 is the frequency of طه (TaaHaa) in Surah 20, called طه.**

The 19th Sphenic Number

5/8/23

- **The 19th Sphenic Number (a Composite that has 3 distinct factors) is 195 = 3 × 5 × 13.**
- **The 195th Lucky Prime is 8719.** In number theory, a lucky number is a natural number in a set which is generated by a certain "sieve". This sieve is similar to the Sieve of Eratosthenes that generates the primes, but it eliminates numbers based on their position in the remaining set, instead of their value (or position in the initial set of natural numbers, Wikipedia.
- **Surah 87 has 19 verses.**
- **The 718th Lonely Prime is 8719**
- **5437 is the 718th prime number.**
- **353rd Gaussian Composite is 5437**
- **5437 is the 455th Lonely Prime.**
- **and 455 is the 114th Tri-Prime.**
- **Recall, Quran has 114 chapters.**

- **Hence, the exponent of the 19th Gaussian Mersenne Prime, i.e., 353 generates the number of م + ح (Hha + Meem) in Surah 42.**
- **The 718th Quad-Prime is 4389**
- **Sura 43 has 89 verses.**
- **The 8719 is part of the 368th Sexy Prime (Primes differing by six).**
- **368 is the frequency of م + ح (HHa + Meem) is Surah 43.**
- **718 = 2 × 359**
- **2359 is the 670th Semi-Prime.**
- **670th verse in the Uninitialed Surahs from the beginning of the Quran is 9:127.**
- **5437th verse in the Quran is 72:28 and Surah 72 has 28 verses.**

The 19th Quad-Prime

5/1/23

- **The 19th Quad-Prime (a Composite number that has 4 prime factors) is 150.**
- **Note, 150 = 2 × 3 × 5 × 5**
- **The 150th Composite is 195.**
- **195 is the 19th Sphenic Number. Note, a Sphenic number is a Tri-Prime with 3 distinct prime factors, i.e., 195 = 3 × 5 × 13.**

- **195 is the numerical value of the initials K, H, Y, A', S in chapter 19.**

- **195 Super Prime is 9619**
- **Chapter 96 has 19 verses.**
- **150th Non-Chen Prime is 2593**
- **2593rd Semiprime is 9899**

- **448th Chen Prime is 25237.**
- **448 is the 361st Composite.**
- **361 = 19 × 19 is the 114th Semiprime. Note, 114 is the number Surahs in the Quran**
- **The 448th Additive Prime is 7019.**
- **Index Prime Index + Prime = Prime**

  114 619 808 + 6211 = 7019
- **Sura 62 (Friday) has 11 verses.**

- **808th verse in the Quran 6:19.**
- **The 114th Prime is 619.**
- **7019 is the 903rd Prime.**
- **903 is the 748th Composite.**
- **748th Lonely Prime is 9127 and surah 9 has 127 verses.**
- **7019 is the numerical value of 9:127.**

The 19th Mersenne Prime and Gaussian Mersenne Prime Number

4/17/23

- **We know that the exponent p, where p is a prime number, of the 19th Mersenne Prime number of the form $MP = 2^p - 1$ is 4253. This tells us that chapter 42 has 53 verses.**
- **Now we investigate a group of complex prime numbers known as the Gaussian Mersenne Primes (GMP). These Primes are of the form $GMP = (1 + i)^n - 1$, where i is an imaginary number equal to the square root of -1. https://en.wikipedia.org/wiki/Mersenne_prime.**
- **The exponent n for the 19th such prime is 353 and 353 is the frequency of حم (HhaMeem) in chapter 42.**
- **The 19th Mersenne prime has 1281 digits (discovered in 1962 by Hurwitz), and it starts with 19079700……91.**
- **We want to see if we can find 797 and 1281 together in the Quran.**
- **We found them in verse 10:16.**

- **797 is the frequency of the verse with the word God, and 1281 is the frequency of the word God. See below.**
- **1378 708 2131 1131 797(1281), 355(560) 10:16 -- Say, had God willed, I would have never recited it to you, and you would have never understood it, although I had indeed spent a life-time among you prior to this. Do you not think?**

- **Let us look at all the numbers in the above verse.**
- **First, we look at 1378.**
- **The Primes with indices 1 3 7 8 are 2 5 17 19**
- **The product of these Primes is 3230 and chapter 32 has 30 verses.**
- **1378 is the 341st Tri-Prime.**
- **341 = 11 × 31 and 1131st Prime is 9127.**
- **708 is the 581st Composite 581 is the frequencies of the usage of Ta + Seen + Meem in chapter 28.**
- **2131 is the 168th Prime.**
- **168th Semi-Prime is 538.**
- **538th Non-Chen Prime is 9127.**
- **1131st Prime is 9127.**
- **355 = 5 × 71**
- **The indices of these Prime factors are 3 and 20.**
- **320th Tri-Prime is 1281, the number of digits in the 19th Mersenne Prime.**

- **560 is the 19th Sext-Prime.**
- **560 = 16 × 5 × 7.**
- **$1657_{19} = 9127_{10}$**
- **1016 = 2 × 2 × 2 × 127.**
- **The indices of these Prime factors are 1 1 1 31.**
- **11131 is the 1349th Prime.**
- **1349 is the 1131st Composite.**
- **1131st Prime is 9127.**

Index	Prime	Composite
19	67	30

4/10/23

- **Chapter 67 has 30 verses.**
- **19 × 67 = 1273 is the number of word "God" from 1:1 to 9:127.**
- **19 × 30 = 570 is the number of frequencies of A, L, M in chapter 32.**
- **570th Gaussian prime is 9127.**
- **The 30th Prime is 113**
- **19 × 113 = 2147 is the frequencies of HaMeem in Suras 40-46**

Index	Prime	Composite
19	67	30

4/3/23

- **The 19th initialed chapter revealed is 43 and 43 has 89 verses.**
- **The 67th un-initialed chapter revealed is 47 and 47 has 38 verses.**
- **We have two numbers 4389 and 4738.**
- **4389 + 4738 = 9127.**
- **4738 = 23 × 2 × 103**
- **The indices of these primes are 9, 1, 27, i.e., 9127.**

The last verse in sura 47 is the 3366th Composite numbered verse in the Quran which is the index of Gaussian Prime 67447 and this is the 6719th Prime.

This is the Quran from the generators 19 and 67

19 + 67 = 86 = 2 × 43

The indices of 2 and 43 are,

1 14 is the number of suras in the Quran.

Index	Prime	Composite
19	67	30

3/27/23

67:30 is the 3816th composite numbered verse from the beginning of the Quran. We also have,

Index	Prime
3816	35923

But,

Index	Lonely Prime
2717	35923

2717th verse from beginning of the Quran is 23:46. Recall 2346th verse from the beginning of the Quran is 19:98 and that 1998th composite is 2346.

Furthermore,

$2346 = 23 \times 2 \times 3 \times 17$ with indices 9, 1, 2, 7.

Please note the following fact.

The last verse in sura 8, 8:75 is the 1235th verse from the beginning of the Quran and the sum of the frequency of the initials A.L.M.R. in chapter 13 is 1482. We have,

$1235 + 1482 = 2717.$

9:127 and observing the Contact Prayers

3/27/23

The 673rd bi-prime is 2363. The 2363rd verse from the beginning of the Quran, including the un-numbered "BismAllah"s, is 19:98.

$$2363 = 17 \times 139$$

Recall 17 units of daily Contact Prayers. 139 is the number of letters in chapter one "the Opener" in the Quran which is recited in each of the 17 daily Contact Prayer.

Furthermore, we have,

Index	Index of Prime	Gaussian Composite (GC)
673	1362	11261

Note 1362nd verse from the beginning of the Quran is 9:127.

36:83 generates 27:30

3/20/23

The last verse in sura 36 which is the 19th initialed sura in the Quran is 83 and 83 is a prime number. Hence, 36:83 is the 951st prime numbered verse from the beginning of the Quran.

951 is a bi-prime and its index is 285. However, 285 = 15 × 19 is the frequency of the initial letters YaSeen in this sura which is called YaSeen.

We also have the following table,

Index	Index of Prime	Lonely Gaussian Prime
323	951	7507

323 = 17 × 19

But 17th composite is 27 and the 19th composite is 30 and we are back to 27:30 where the opening statement of sura 9 is compensated.

The last revealed verse

3/13/23

The last revealed sura is 110 and it has 3 verses. This makes sura 110 to the 114th revealed sura. Hence, the concatenation of the sura and the number of verses yields 1143. Recall,

1143 = 9 × 127 and 1143rd composite is 1362, and 1362 is the number of verses from 1:1 to 9:127.

Furthermore, the 110:3 is the 1719th prime-numbered verse from the beginning of the Quran. Recall that 1719th verse from the beginning of the Quran in the initialed suras is 27:30 where the missing opening statement of sura 9 is compensated.

Chapter 2, the first initial sura in the Compilation Order

3/6/23

The last verse in sura 2 is 286 and it is a composite. The number of composite-numbered verses from the beginning of the Quran to 2:286 is,

226. The properties of number 226 is tabulated below.

Index	Lonely Prime	Individual Twin Prime
226	2521	4271

2521 is the number of the frequency of the letter "ا" "alif" is sura 3. 4271 is the 114th twin prime pair. It is also the number of verses from 1:1 to 42:1. Recall that the 42nd un-initialed sura is 71.

58:21 - God has decreed that most assuredly I and My messengers shall be victorious. Indeed, God is All Powerful, Almighty.

Let us study this verse and we then shall realize the power of the message that God is sending.

We look at the revelation order of this verse which is 5881. We notice that 5881 is the 285th individual twin prime. Note, 285 is the total frequency of YaSeen in sura 36 which is 19th initialed sura in the Quran.

The 775th prime is 5881 and 775 is the numerical value of the word "Al-Muddather" or the "Hidden Secret".

Let us look at 58:21 or 5821.

5821 is the 764th prime and $764 = 2 \times 2 \times 191$

The indices of these prime factors are 1 1 43 and $1143 = 9 \times 127$.

We have,

Index	Index of Prime	Gaussian Prime
764	1514	12671

1514 is the 1273rd composite and $1273 = 19 \times 67$ is the frequency of the word God in 9:127.

Furthermore,

Index	Index of Prime	Semi Prime	Prime/Gaussian Composite
376	764	1273	5821

This again tells that sura 9 has 127 verses.

619th Lonely Prime

2/27/23

The 619th Lonely Prime (LP) is 7541 and it is also a Gaussian Composite. We can therefore we can set up the following table;

Index	Index of LP	Index of Prime	GC/LP/Prime
473	619	956	7541

Let us look at these indices, namely, 473, 619, 956.

473 = 11 x 43; but 1143 = 9 × 127, and 9 has 127 verses.

619 is the 114th prime number and the Quran has 114 chapters.

956th composite is 1146 and chapter 114 has 6 verses.

Connections of 9:127 to the Initials

2/20/23

Sura 11 verse 31 describes how 9:127 generates the number of ي (Ya) and س (Seen) in sura 36 and the number of ح (Ha) and م (Meem) in sura 40 and vice versa.

Concatenation of sura number, 11, and the verse number, 31, yields the number 1131. Note, that the 11th prime is 31. The number 1131 is the index of prime number 9127. We also note that the verse 11:31 is the 357th prime-numbered verse from the beginning of the Quran.

The index of composite 357 is 285 and 285 is the frequency of the initials "Ya" and "Seen" in sura 36 which is the 19th initialed sura in the Quran.

The 357th composite is 444 and 444 is the frequency of the initials "Ha" and "Meem" in sura 40.

357 can be factored out into its prime factors and we have,

357 = 3 × 7 × 17

The indices of the prime factors are 2, 4, and 7. The 247th Gaussian prime is 3491 and 3491 is the total number of verses in the un-initialed suras in the Quran assuming 9:127.

More Relations between Quranic Initials and 9:127

2/13/23

The 619th prime-numbered verse from the beginning of the Quran is 21:43.

But we have the following table for the mathematical properties of 2143.

Index of Ind. TP	Index of GP	Index of Prime	GP/TP/Prime
133	166	324	2143

133 is the frequency of NuN in sura 68. 166 is the frequency of H + M in sura 44. 324 in the frequency of H + M in sura 41. Note, 324 in also the frequency of M in sura 43. However, the way 166 is lining up with 324 is amazing. This is because, as mentioned above, 166 is the frequency of H + M in sura 44. But 44 is also the frequency of H in sura 43! This makes the H + M in sura 43 to be

44 + 324 = 368! The importance of 133 should also be added in a further role, because 133 = 7 × 19 and there are in fact 7 HaMeem – initialed suras!

Recall that 21:43 is the 619th prime-numbered verse in the Quran and 619 is the 114th prime number and that 114th composite 150. But 150 is the frequency of M in sura 44. This leads to the fact that,

	Sura #	Frequency of M	Frequency of H	Frequency of H + M
Comp	44	150	16	166
Index	29	114	9	127

Referring to 29 initialed suras, 114 total suras, and 9 has 127 verses.

We further have the Quranic revelation order:

10:28 -- 2143 1143.

But, 1143 = 9 × 127. Also recall that 1028 signifies the fact that 102 has 8 verses.

2143 is also the 67th twin prime pair and 67 is the 19th prime number. Also, the 67th tri-prime is 279 which is frequency of TaHaa in sura 20.

We also note that the 324th prime is 2143 and the 324th quad prime is 2044.

Or tabulating this, we have,

Index of prime and Quad-Prime	Prime	Quad-Prime
324	2143	2044

But 2044 is the revelation order of the word God in 59:24.

The index of 5924 is 5145 and,

5145 = 3 × 7 × 7 × 5 × 7

With indices 2, 4, 4, 3, 4. The five daily contact prayers.

The 19th Twin Gaussian Primes and 9:127

1/30/23

The 19th Twin Gaussian Prime (TGP) pair is,

Index of TGP pair	Index of GP	Index of Indiv TGP	TGP pair
19	73,74	36,37	823,827

Verses 8:23 and 8:27 are the keys.

1183 491 4922 2422 650(1038), 953(1273) 274 8:23

The light green numbers underlined are the revelation order of the verses containing the word "God" and in parentheses is the frequency of the revealed word "God".

Recall that 1273 = 19 × 67 is the frequency of the word "God" in 9:127 and is the index of composite 1143 = 9 × 127!

1187 495 4926 2426 653(1042), 956(1277) 905 8:27

1187 is the index of prime 9619, telling us 96 has 19 verses. But 9619 is the 790th lonely prime and $790_{19} = 2698_{10}$. Recall 2698 is the total number of word "God" in the entire Quran. Also 1187 is the 114th lonely prime and 114 is the number of Suras in the Quran.

Also 956 is the index of composite 1146 and 114:6 verses. 1146 is the index of 1365 which is the order of revelation of 19:98. 1365 = 3 × 5 × 7 × 13 with indices 2,3,4,6. Remember the 1998th composite 2346 = 23 × 2 × 3 × 17 with indices 9,1,2,7, declaring 9 has 127 verses. Based on this 2346 is the number of verses from 1:1 to 19:98!

Note, in this exercise all numbers associated with 8:23 and 8:27 are independent of 9 having 127 or 129 verses. However, they generate 9:127 verses.

Order of Revelation of the word God

1/23/23

The revelation order of the verses in the Quran is connected to the compilation order. This physical fact also tells us where specific verses are located and how many verses a sura must have. Furthermore, it magnifies the literal contents of the verses in the Quran.

We start with sura 9 and the missing "BismAllah".

1236 544 6105 3362691(1106), 1719(2529) 9:1

> **Freedom from obligations has been decreed by God and His messenger for those who have a treaty with you from amongst those who set up partners for god.**

The underlined number 1719 which is the revelation order of verses containing the word God is the key here and it tells us where the "BismAllah" in this sura has be mentioned. Note, the 17th composite is 27 and the 19th composite is 30 so we are led to 27:30. Now let us go to 27:30.

3187 1719 1853 964 1204(1815) 2377 27:30

It is indeed from Solomon and it is indeed "in the name of God, The All Gracious, The All Merciful."

Note, the order of revelation of verses in the initialed suras being 1719 as the 1719 revelation of verses containing the word God.

Sura 110 which is 114th revealed sura has 3 verses and the last verse is the 1719th prime-numbered verse which goes back 27:30 and 1143 = 9 x 127.

Now we go to Sura 13 verse 43. Here is the verse.

1748 1078 5554 2743929(1450), 1387(1982) 419 13:43

And the unfaithful say; you are not a messenger. Say, God suffices as a witness between me and you and those who possess knowledge of the scripture.

Note the underlined revelation order of the word God.

1387 = 19 × 73 with indices 8 and 21.

Index	Prime	Composite
821	6311	988

Note 98 has 8 verses and 63 has eleven verses. More to the point, sura 98 is called the "proof" and sura 63 is called "the hypocrites"

1982 = 2 × 991 with indices 1 and 167.

- **1167th Composite is 1389**
- **1389th Prime is 11519**
- **11519 is the 670th Additive Prime**

- **670th verse in the uninitialed suras is 9:127**
- **11519 is the 475th Lonely Gaussian Prime**
- **475th Initialed Verse Revealed is 19:1**
- **475 = 5 × 5 × 19**
- **5519th Composite is 6346, the total number of verses in the Quran.**

More on 9:127

1/16/23

We have all seen the mathematical connections between the fact that the Quran authored by God and revealed by Him had 127 verses in sura 9 and the Contact Prayers and their true numbers of daily units.

This time we go to sura 62:11 which is the last verse in sura 62. We note 11 is a prime number, hence 62:11 is a prime-numbered verse, and it is the 1354th prime-numbered verse from the beginning of the Quran.

5186 2495 5955 3212 1733(2567,2568), 1605 (2341,2342) 1354 62:11 – However, when they see a business or amusement, they rush to it and leave you standing. Say, what is reserved at God is far better than any amusement or business. And God is the best Provider.

Let us look at the following table.

Index of GC	Index of Prime	Prime/ Gaussian Composite (GC)
1354	2719	24509

The inter-index relation is the key. Now let us go to verse 27:19.

3176 1708 1842 953 781 27:19 -- He then smiled and laughed at her statement and said, my Lord make me be appreciative of Your blessings that You have bestowed upon me and my parents and do righteous deeds that pleases You and admit me into Your mercy along with Your righteous servants.

Note the order of the revelation of verse in the initialed suras is 953 which is the index of composite 1143 = 9 x 127. This directly connects Jumaa Prayer to 9:127.

Also note the order of the revelation of the word God, 2342. 2342 is the index of composite 2743 which is the total number of verses in the initialed suras.

More on 9:127, verse 17:111

1/9/23

2136 911 2115 1000 1033(1583), 196(243) 1600 17:111 -- Say, praise God the One who has not begotten a son nor does He have any partners in kingship and He has no heir because of need, and you shall extol Him continuously.

We started reciting the pertinent part of this verse i.e., "praise God the One who has not begotten a son, nor does He have any partners in kingship and He has no heir because of need" according to God's command. God tells us that He inspired the descendants of Abraham to do good deeds, observe the contact prayer and give the cleansing charity as it is stated in 21:73. This was also inspired by God to us as part of the constant evolution towards a better and more complete way to worship God. Accordingly, as always, God gives the proof to reassure us and make our faith stronger. The keys here are the order of the revelation of the word God and the verses containing the word God, which are underlined in light green above.

Index of LG Lonely Gaussian Prime (LG)

243	5519

Note, the 5519th composite is 6346 which is the total number of verses in the Quran including the un-numbered "BismAllah"s. Furthermore, verse 55:19 is the 1273rd prime-numbered verse from the beginning of the Quran and 1273 (= 19 × 67) is the frequency of the word God from the beginning of the Quran to 9:127.

Index of Tri-prime	Tri-prime
196	790

Note, 9:127 is the 790th verse containing the word God from the beginning of the Quran. Moreover, $790_{19} = 2698_{10}$. We note, 2698 is the total frequency of the word God in the Quran.

The true number of verses in un-initialed and initialed chapters

The order of revelations of the verses are shown in "purple". The very first numbered," In the name of God, The All Gracious, The All Merciful" constitutes the very such verse in the compiled version of the Quran and it is the very first of the sura "The Opener". This very important verse in which God introduces Himself to the reader of the Quran is the 148th verse in the order of revelation. Let us look at the consequences of this numerical position.

Index	Lonely Gaussian Prime	Index + Prime = Composite
148	3491	182 + 1091 = 1273

The second number 3491 is the total number of verses in the un-initialed suras in the Quran. The second number, 1273 is the number of word God mentioned from beginning of the Quran to 9:127. It is noteworthy, 1091 is the numerical value of the word "Ramadan" signifying the month that Quran was revealed.

The revelation order of the verses with the word God in the last verse of sura 29 is to verify the number of verses in the initialed suras. Note, there are 29 initialed suras in the Quran. Verse 29:69 which is the last verse in sura 29, contains the word God and it is 769th verse revealed with such a property. Now, let us look at numerical property of 769.

3407 1939 4577 2214 1273(1904), 769(970)29:69 -- As for those who strive in Our cause, We will surely guide them to Our ways. And indeed, God is always with the righteous.

Index	Semi-Prime
769	2743

Note, 2743 is the total number of verses in the initialed suras.

5197 2506 5860 3117 1742(2581,2582), 1529(2212,2213) 1359 63:11 -- But God will never extend the interim for any soul. And God is fully Cognizant of everything you do.

Here to emphasize the gravity of this statement the count of the prime-numbered verses is in the last verse of sura called "The Hypocrites" is to generate the number of suras in the Quran, i.e., 114 and go back to the base of the Quran mathematics which is the number 19.

Let us look at the 1359th prime number and we find out that it is 11243. But 11243 happens to be a twin Gaussian prime and it is 114th such prime pairs. The number 11243 is also the 227th individual twin Gaussian prime and 227 is the 19th individual twin Gaussian prime.

This adds to the gravity of the verse 19:92, where the 19th frequency of the word "The All Gracious" is mentioned.

2340 1321 1359 566 19:92 -- It is not befitting for The All Gracious to beget a son!

Note, here that 1359 in this verse is the count of verses in the Quran in the order of revelation.

Frequency of the word God in initialed chapters

1/2/23

The frequency of the word God provides an independent method, i.e. independent of chapter 9, to generate the parameters of the Quran. This method is based on the inter-index relations we have been discussing for the past couple of years. For this we go to sura 9:127 and we find it contains 2696th frequency of the word God in the revelation order. If we look at the 2696th prime, we find it is also the 1343rd Gaussian composite (GC). We show this in the following table.

Index of GC	Index Prime	Prime/GC
1343	2696	24229

Now we see from the above table that 1343 tells us that sura 13 has 43 verses. So, the order of the revelation of the word God in 9:127 leads us to this information. Note sura 13 is the last initialed sura revealed.

1748 1078 5554 2743 929(1450), 487(729) 1387(1982) 419 13:43 -- And the unfaithful say; you are not a messenger. Say, God suffices as a witness between me and you and those who possess knowledge of the scripture.

The key here is the underlined number 729. The number 729 is the index of prime number 5519. We know that 5519 is the index of composite 6346 which is the true total number verses in the Quran.

Verse 55:19 is the 1273rd prime-numbered verses from the beginning of the Quran and 1273 = 19 × 67 is the frequency of the word God from 1:1 to 9:127.

Note all the signs presented here are independent of sura 9 having 127 or 129 verses but it generates sura 9 having 127 verses only and all other parameters of the Quran rejecting the two added verses.

Last verse in surah 8

12/27/22

The last verse in sura 8 states,

1235 543 4974 2474 690(1104, 1105), 993(1339, 1340) 941 8:75 -- And those who attained faith later on and emigrated and strove alongside you, then they also belong with you. Those who are relatives; some possess higher priority over others according to God's scripture. Indeed, God has full knowledge of all things.

Note here, the key is the underlined number 941. The 941st composite is 1131 and the 1131st prime is 9127. Recall here that 941 keeps track of all

the composite-numbered verses from the beginning of the Quran. Here, since we are in sura 8, this number is completely independent of number of verses in sura 9.

The missing "In the Name of God, the all Gracious, the all Merciful" in sura 9

12/20/22

The fist verse in sura 9 states,

1236 544 6105 3362691(1106), 1719(2529) 9:1 -- Freedom from obligations has been decreed by God and His messenger for those who have a treaty with you from amongst those who set up partners for god.

The key here is the underlined number 1719. If you go to sura 27:30, you will find that that it is 1719th verse from the beginning of the Quran to 27:30 in the initialed suras. Recall that 27 is the 17th composite and 30 is the 19th composite. Hence, 9:1 tells us where to look for the missing "In the Name of God, the all Gracious, the all Merciful"

19th Semi-prime 55 Generates key parameters of the Quran

The 19th semi-prime is 55. There are only 2 ways to concatenate these two numbers: either 5519 or 1955. First, we have,

Index	Composite
5519	6346

Note, from the above table 5519 by the virtue of being the index of the composite 6346 generates the total number of verses in the Quran, including the un-numbered "Bism Allah"'s. Now to 1955.

Index	Composite
1657	1955

Here $1657_{19} = 9127_{10}$. Again, it generates 9:127.

Furthermore,

Index	Quint-prime
1955	19521

Recall, 19 and 521 are the prime factors of 9899; or $9899 = 19 \times 521$. Note, 9899 is the frequency of A + L + M in sura 2 which is the first initialed sura in the Quran.

The prime factors of 1955 are.

$1955 = 5 \times 17 \times 23$ with indices 3, 7, 9.

The 379th lonely Gaussian prime is 9127, again generating 9:127.

The 569th verse containing the word God in the initialed surahs

12/13/22

The 569th verse containing the word God in the initialed suras is 27:93, the last verse in sura 27. Recall 27 is the only sura containing two opening statements of the Quran or "Bism Allah".

3250 1782 1916 1027 1222(1835), 569(822) 2426 27:93 -- And say, praise God, He will soon show you His signs, and then you will recognize them. And your Lord is never unaware of what you do.

Index	Index of the Prime	Prime/Gaussian Composite
569	1143	9221

1143 = 9 × 127, and sura 92 has 21 verses. Important note is the fact 92 is the numerical value of the word Muhammad and sura 21 is called "the Prophets". Therefore, the above mathematical relations tell us that Muhammad was the final Prophet (33:40). A Prophet is a scripture bearing messenger.

Again, note that the count of the word God in the initialed suras is independent of number of verses in sura 9.

2147 and 5917

12/6/22

Index of the Lonely Gaussian Prime (LG)	Index of Chen Prime	Index of Prime	Prime/LG/Chen Prime
2147	2730	5917	58439

2147 is the frequency of "H"s plus "M"s in suras 40 through 46. This number has an inter-index relation with 2730 and 5917.

5202 2511 5917 3174 1362 64:5 – Do you not know the news of those who disbelieved previously? Thus, they enjoyed temporarily, but their situation deteriorated; and reserved for them is a painful suffering.

Index	Semi-Prime	Tri-Prime
1596	5917	6234

1596 is the numerical value of the "Month of Ramadan" and 6234 is the total number of numbered verses in the Quran. Recall the Quran was revealed during the month of Ramadan (2:185).

1362nd verse in the Quran is 9:127. The index of Composite 1362 is 1143 = 9 × 127 (Milan Sulc, private comm.)

Recall;

Index	Prime
9	23
1	2

2	3
9	23

And,

$23 \times 2 \times 3 \times 23 = 3174$.

Therefore, 2147 generates 9:127, and 6234, witnessed by two only and 2730 signifies verse 27:30 where the missing BismAllah of sura 9 is compensated.

Generator 1967

12/6/22

Index	Prime	Composite
19	67	30

Chapter 67 has 30 verses.

$19 \times 67 = 1273$ is the number of word "God" from 1:1 to 9:127.

$19 \times 30 = 570$ is the number of frequencies of A, L, M in chapter 32.

570th Gaussian prime is 9127.

An index-prime concatenation of 19 and 67 produces 1967 which is semi prime with an index of 569.

Now let us look at the following table.

Index	Index of Prime	Index of LP	Semi-Prime	Prime/GP/LP
569	1143	760	1967	9221

Hence, 569 is generated by 1967. Now, $1143 = 9 \times 127$ and sura 92 has 21 verses.

4507 2610 3443 1967 1557(2295), 760(1074) 45:36 -- Therefore, praise God, Lord of the vacua and matter, Lord of the multiverse.

2698 1236 4022 1967 23:27 -- We therefore inspired him to construct the ship under Our eyes and according to Our inspiration, then when Our command is issued and the pot boils over, take a pair of every kind and your family except those amongst them who are marked, and do not talk to me on behalf of those who have transgressed, they will surely drown.

9:128 and 9:129 are rejected at the time of The Revelation of the Quran

11/30/22

Sura 96 is the first sura that was revealed. We can concentrate on 96:1 and 96:9 to see what we can conclude about sura 9 and its number of verses. We can write the following.

Index	Composite	One possible way to Factorize
961	1152	$1152 = 9 \times 128$
969	1161	$1161 = 9 \times 129$

Now, in the following analysis we shall see how these two verses are rejected immediately at the outset.

Let us do further analysis on 961.

961 is the 798th composite and 798 is the frequency of K, H, Y, A', S in sura 19.

961 = 31 × 31 with indices of 11 and 11. We now check verse 11:11 in the Quran.

1482 812 2235 1235 351 11:11 -- Not so are those who have steadfastly persevered and led a righteous life, awaiting them is forgiveness and a generous recompense.

812 is the number of verses from the beginning of the Quran in the initialed suras. The index of composite 812 is 670 which is the number of verses in the un-initialed suras from the beginning of the Quran to 9:127.

Furthermore, 812 + 670 = 1482. Note that 1482 is the frequency of A, L, M, R in sura 13. We can write the following table.

Index	Prime
1	2
4	7
8	19
2	3
2 × 7 × 19 × 3 = 798	

Shows the circular connection of initials in suras 13 and 19.

Now we look at 969.

969 = 19 × 51.
But 51 = 3 × 17. The number 317 is the count of prime-numbered verses from the beginning of the Quran to 9:127.

1362 670 6231 3488 790(1273), 1818(2696) 317 9:127 -- And when a sura is revealed they look at one another; has anyone seen this?! They thus turn away. God has diverted their hearts for indeed they are people who do not understand.

969 = 19 × 3 × 17 with indices 8, 2, 7. Let us look at 827.

The 19th Twin Gaussian Prime (TGP) pair is,

Index of TGP pair	Index of GP	Index of Indiv TGP	TGP pair
19	73,74	36,37	823,827

Verses 8:23 and 8:27 are the keys.

1183 491 4922 2422 650(1038), 953(1273) 274 8:23 -- Had God known of any good in them, He would have made them understand. Even if they could understand, they would have still turned away complaining.

The light green numbers underlined are the revelation order of the verses containing the word "God" and in parentheses is the frequency of the revealed word "God".

Recall that 1273 = 19 × 67 is the frequency of the word "God" in 9:127 and 953 is the index of composite 1143 = 9 × 127!

1187 495 4926 2426 653(1042), 956(1277) 905 8:27 -- O you who have faith, do not betray God and the messenger and neither shall you betray deposits entrusted to you while you know.

1187 is the index of prime 9619, telling us 96 has 19 verses. But 9619 is the 790th lonely prime and $790_{19} = 2698_{10}$. Recall 2698 is the total number of the word "God" in the entire Quran. Also 1187 is the 114th lonely prime and 114 is the number of Suras in the Quran.

Also 956 is the index of composite 1146 and 114:6 verses. 1146 is the index of 1365 which is the order of revelation of 19:98. 1365 = 3 × 5 × 7 × 13 with indices 2,3,4,6. Remember the 1998th composite 2346 = 23 × 2 × 3 × 17 with indices 9 1 2 7, declaring 9 has 127 verses. Based on this 2346 is the number of verses from 1:1 to 19:98!

Note, in this exercise all numbers associated with 8:23 and 8:27 are independent of 9 having 127 or 129 verses. However, they generate 9:127 verses.

Number of Daily Contact Prayers and Number of Units and the Friday Contact Prayer

11/23/22

1748 1078 5554 2743 929(1450), 487(729) 1387(1982) 419 13:43 -- And the unfaithful say; you are not a messenger. Say, God suffices as a witness between me and you and those who possess knowledge of the scripture.

419th prime-numbered verse in the Quran is 13:43. Let us look at the following tables:

Index	Composite	Lonely Prime	Total Number of verses
419	517	5003	5003 + 1343 =6346
Index	Lonely Prime	Quad-Prime	Conclusion
517	6211 (Friday)	3174=23×2×3×23 9129	5 times, 17 units

It is interesting that even after addition of the 9:128 and 9:129, the number of units always remained 17 since the time of the Prophet. This shows mathematically, first the importance of the Friday Contact Prayer, the number of daily prayers and the total number of units (rakaa), as well the true total number of verses 6346.

Note also, the word God in 13:43 is 729 in the initialed suras. 729th prime is 5519 and 5519th composite is 6346 or the total number of verses in the Quran. Recall 6346 includes the un-numbered opening statements "In the Name of God, The All Gracious, The All Merciful".

A further observation reveals that verse 55:19 is the 1273rd prime-numbered verse in the Quran and 1273rd frequency of the word God is in 9:127.

The Importance of Friday Contact Prayer

11/16/22

Index	Prime	Index + Prime = Prime
114	619	808 + 6211 = 7019

Sura 62 has 11 verses and 808th verse in the Quran 6:19 and as you see 114th prime is 619.

808 322 2576 1019 534(875,876) 189 6:19 -- Say, what is the greatest testimony? Say, God testifies between me and all of you. Furthermore, He has inspired this Quran to me to warn you therewith and whoever receives it. You indeed testify that there are other gods with God. Say, I do not testify like you; indeed, He is one god and I am surely far removed from what you set up as partners for god.

7019 is the 903rd prime number and 903 is 748th composite and 748th lonely prime is 9127.

Generators of the Quran

11/9/22

Since 2007, at the Sedona meeting, I have been saying that the prime numbers and their indices "generate" the Quran. This idea, inspired by God, has taken shape and is providing a "blind" analysis to generate various parameters of

the Quran, i.e., number of verses in each sura and revelation and compilation order of the sura and the frequency of usage of the Quranic initials.

Here, again, I bring you an example.

The 19th tri-prime is 78 and let us look at the following table.

Index	Tri-prime	Operation
19	78	19 × 78 (multiplication)
19	78	1978 (concatenation)

First the multiplication operation yields 19 × 78 = 1482. 1482 is the frequency of A, L, M, R. in sura 13. Note, the following table and see what we can learn from 13 and why 13?

Table of integers mentioned in the Quran in ascending order

Index	Integer
1	1
2	2
3	3
4	4
5	5
6	6
7	7
8	8
9	9
10	10
11	11
12	12
13	19

From this table we find that the 13th integer in the Quran is number 19. Now let us see again how the number of initials in sura 13 generates the number of initials in sura 19?

Index	Prime
1	2
4	7
8	19
2	3
$2 \times 7 \times 19 \times 3 = 798$	

798 is the frequency of K, H, Y, A', S in sura 19.
The index of composite 798 is 658 and $658 = 2 \times 7 \times 47$. Note here at a very simple level we have $6 + 5 + 8 = 19$. The index of Composite 2747 is 2346 and 2346 is the number of verses from 1:1 to 19:98. But the index of composite 2346 is also 1998, and sura 19 has 98 verses.

2747 is the index of composite 3200 and sura 3 has 200 verses. The 19th permutation of 2346 is 6234 and this is the total number of numbered verses in the Quran. The difference between the 19th and 1st permutations, i.e., $6234 - 2346 = 3888$ and sura 38 has 88 verses.

2346 = 23 × 2 × 3 × 17 with indices 9, 1, 2, 7 and sura 9 has 127 verses. Note, the reason behind writing the factors of 2346 in that order is because it generates 9127 and 9127 is the 19th permutation of 1279!

Now remember we had the number 2747 that generated all these Quranic parameters. Look at the following table and this also can be generated from the following inter-indexal relation.

Index of Lonely GP	Index of GP	GP, Lonely GP
1978 (concatenation)	2747	53719

This is a circular relation of primes and their indices which we are learning only through God's teaching of the Quran.

The 19th 6-Prime Controls the number of verses in sura 9

11/2/22

The 19th 6-prime is 560 and it is there to generate the fact that chapter 9 in the Quran has 127 verses. A 6-prime is a composite that can be factored out into six (6) primes. In this case, we have,

560 = 2 × 2 × 2 × 2 × 5 × 7.

Now let us look into Ultimate Mathematics and we shall find a huge inter-indexal relation which boggles the mind.

Index of Lonely GP	Index of Prime	Prime, Lonely GP
560	1657	14051

Note the inter-index relation the 560th Lonely Gaussian Prime is the 1657th regular prime and we have

$1657_{19} = 9127_{10}$.

Again, one can see that the structure of the Quran is with its generator which is 19-based Prime-Index Mathematics. 74:30 – Over it is 19.

Generators for the initials and Sura 9 10/27/22

Here is the table of Gaussian Composites.

Index	P. Index	Gaussian Composite
1	1	2
2	3	5
“	“	“
19	40	173
“	“	“
47	98	521

“	“	“
209	422	2917

209 is the total frequencies of A + S + Q in Sura 42. Note, A.S.Q. is 42:2 (Hafs version only!). 2917 is the 11th permutation of 1279 and the 19th permutation of 1279 is 9127 and sura 9 has 127 verses. Note, 209 = 11 ×19!

We also have the following,

Index of LG Prime	Index of Prime	Prime/LG Prime
422	1254	10223

1254 is the frequency of the initials A, L, M is sura 30.

10223 is the concatenation of 102 and 23 and we know that 23rd tri-prime is 102 and 102 = 2 × 3 × 17 and the indices of these primes, namely 23, 2, 3, and 17 are 9, 1, 2, 7; reaffirming sura 9 has 127 verses.

This also tells us that 42:2 is the correct verse number for ASQ, hence, only Hafs version of the Quran is correct.

Generators for the initials and the Number of Verses of Chapters
10/20/22

Let us look at the following table.

Index of Prime	Prime
1254	10223

The index relation here connects the frequency of A.L.M. in chapter 30, i.e., 1254. Now, let us look at the following table.

Index	Composit
1049	1254

Sura 104 has 9 verses.

Now let us look at the following table. We see 10223 has the following form.

Index	Tri-Prime
23	$102 = 2 \times 3 \times 17$

Index of 23	The indices of 2, 3, and 17
9	1 2 7

Generators for the initials and the Number of Verses of Chapters
10/13/22

Let us look at the following table and try to understand how the number 19 generates many of the parameters of the Quran.

Index	Index Additive Prime
19	98 + 521= 619

From the above table, we note that chapter 19 has 98 verses. The multiplication of 19 and 521 yields the following.

19 × 521 = 9899, the number of the frequency of A, L, M in chapter 2.

The index of prime number 619 is 114, the number of chapters in the Quran.

The index of prime number is 8 and chapter 98 has 8 verses.

619th prime number is 4567 and the 19th permutation of 4567 is 7456. Chapter 74 has 56 verses. Note 74 is the chapter where 19 is mentioned.

Furthermore,

$19 \times 98 = 1862$

Index of Gaussian Prime	Index of Prime	Prime/ Gaussian Prime
941	1862	15991

1862 is the number of word God in 28:88. Let us look at the following table.

However, 941st composite is 1131 which is the index of prime number 9127. Again, telling us that chapter 9 has 127 verses.

Inter-index Relations Generators of the Quran

Let us look at the 19th set of Twin TPCs

Index	Prime	TPC Index	Twin TPC
19	67	333, 334	19422, 19428

- **The total number of verses in the Quran $19 \times 334 = 6346$**
- **$333_{19} = 1143_{10} = 9 \times 127.$**
- **Note, $3 + 3 + 3 + 3 + 3 + 4 = 19$**

- **1 + 9 + 4 +2 +2 + 1 + 9 + 4 +2 + 8 = 42**
- **19 × 42 = 798**
- **Note, 798 is the frequency of K.H.Y.A.S. in sura 19.**

The 658th composite is 798 and 658 = 2 × 7 × 47. Note, at a very simple level we have 6 + 5 + 8 = 19. The index of Composite 2747 is

Index of GP	Index of Prime	Gaussian Prime (GP)
334	658	4931

2346 and 2346 is the number of verses from 1:1 to 19:98. But the index of composite 2346 is also 1998, and sura 19 has 98 verses.

2747 is the index of composite 3200 and sura 3 has 200 verses. The 19th permutation of 2346 is 6234 and this is the total number of numbered verses in the Quran. The difference between the 19th and 1st permutations, i.e.,

6234 – 2346 = 3888 and sura 38 has 88 verses.

2346 = 23 × 2 × 3 × 17 with indices 9, 1, 2, 7 and sura 9 has 127 verses. Note, the reason behind writing the factors of 2346 in that order, i.e., 23 × 2 × 3 × 17 is because it generates 9127 and 9127 is the 19th permutation of 1279! Recall 74:30 – Over it is 19

Generators of the Quran
10/6/22

Here again we discover that the Ultimate Mathematics only generates verses in the Quran witnessed by at least two eyewitnesses. Let us look at the following table called "emirp".

An emirp (*prime* spelled backwards) is a prime number that results in a different prime when its decimal digits are reversed. (Eric W. Weistein, MathWorld)

Table of Emirps with their Indices

Index	Emirp	Index	Emirp
1	13	17	337
2	17	18	347
3	31	19	359
4	37	20	389
5	71	21	701
6	73	22	709
7	79	23	733
8	97	24	739
9	107	25	743
10	113	26	751
11	149	27	761
12	157	28	769
13	167	29	907
14	179	30	937
15	199	31	941

16	311	32	953

First, we discuss the 19th emirp which is 359. The 32nd emrip is the reverse of 359 which is 953. But 953rd is the index of composite

1143 = 9 × 127.

In the above table in "blue" we have the 11th and 31st emirps. 941 which is the emirp of 149 happens to be the index of composite 1131 which is the index of 9127!

352 345 5033 2559 211(341), 209(339) 1030(1397) 82 3:59 -- Surely, the example of Jesus as far as God is concerned is just like the example of Adam. He created him from clay and said to it, be and it then became.

Also recall that,

Index	Prime(I) + Comp(I) = Prime
19	277(59) + 82(59) = 359

Look at the numbers of 3:59 and above table and remember 74:30 – Over it is 19. Verses 3:59 is the 82nd prime-numbered verse which is generated by the above table and shows the eternity of the religion. It is also the verse 59 which is the index of the prime 277 and composite 82. Sura 82 has 19 verses. And 1030th prime is 8219!

352 is the numerical value of the Quran. 2559 = 3 × 853 with indices 2, 147 and the total number of H.M. in suras 40-46 is 2147.

209 is the frequency of A.S.Q is sura 42. (339) is the index of composite 422 and A.S.Q. is verses 42:2.

211 is the 47th prime and sura 47 is called Muhammad. (341) = 11 × 31 and 1131st prime is 9127.

With the manifestation of these signs, the truthfulness of 3:59 becomes self-evident. Believing contrary to this verse is opposition to God and bears grave consequences.

Primes Explain Why Different Numbers Assigned to a verse

9/29/22

By now God has taught us that every parameter in the Quran is generated by the Prime-Index mathematics. This mathematics again only generates those verses whose revelations were witnessed by at least two witnesses. This means that sura 9 has only 127 verses which were witnessed by at least two witnesses.

Additive Primes and their Indices

These primes are of the type that the sum of their digits also add up to prime number. For example, 23 is an additive prime since 2 + 3 = 5 is a prime, but 19 is not an additive prime because 1 + 9 = 10 is a composite.

Table of Additive primes

Index	Additive Prime	Index	Additive Prime
1	2	“	“

2	3	“	“
3	5	19	139
4	7	42	359
“	“	“	“
12	67	548	9127

In the above table we see that the 19th additive prime is 139 and 139 is the number of letters in the first chapter in the Quran called the “Opener”. The 42nd additive prime is 359 which is actually the 19th “Emirp”. We do have the following relation.

19 × 42 = 798 which is the frequency of K, Ha, Ya, Ain, S is sura 19.

The 548th additive prime is 9127 and the 548th composite is 670. A look at the number of verses in the un-initialed suras in the Quran reveals that 670th such verse is 9:127.

Generators of the Quran

9/22/22

The 19th *emirp* which is 359. Verse 3:59 is where God tells us about the similarity between the creation Adam and Jesus.

Now we look at each single digit in 359, namely 3, 5, and 9. The primes corresponding to these indices are 5, 11, and 23. The digital properties of being the indices of primes are independent of the order of 3, 5, and 9. Since 953 which is the *emirp* of 359 has exactly the same property of 359. Recall that 953 is the index of 1143 = 9 × 127.

Multiplying these primes yields.

5 × 11 × 23 = 1265

Properties of 1265 are through the "inter-index" relations. Let us look at the following table.

Index of Lonely Prime	Index of Prime	Prime/Lonely Prime
1265	1820	15607

Here 1820 is the number of verses where the word God is mentioned in the entire Quran.

Analysis of 1820 in terms of indices of prime yield the following.

Index	Prime
1	2
8	19
20	71

The product of the 3 primes on the right column of above table reveals the following Quranic fact.

$2 \times 19 \times 71 = 2698$

2698 is the frequency of the word God in the entire Quran. Note these counts are all consistent with 9:127.

Generators of the Quran

9/15/22

The generators of the Quran based on primes and their indices generate only those verses revealed by God and were witnessed by at least two persons. These verses are 6234 numbered verses and 6346 total verses. This does not generate the two verses purportedly witnessed by Khuzaima Ibn Thabit Al-Ansari, namely 9:128, and 9:129.

The 3488th revealed verse in the un-initialed surahs is 9:127. The following table reveals the following Quranic fact.

Index of Gaussian Prime	Index of Prime	Prime/Gaussian Prime
1754	3488	32503

From the above table, we see the inter-index relations again. 1754 is the number of Composite-numbered verses from the beginning of the Quran to 19:98.

Recall that 1754 is generated from the following table.

Index	Prime	Composite
19	67	30

6719 is the 867th prime number and we have the following table.

Index of Lonely Gaussian Prime	Index of Lonely Prime	Lonely Prime/ Lonely Gaussian Prime
867	1754	22447

Note, the composite-numbered verse 19:98 is generated by the prime 67 and index 19. Recall that 1998th composite is 2346 and 2346 is the number of verses from 1:1 to 19:98. Furthermore, the 19th permutation of 2346 is 6234, which is the total number of numbered verses in the Quran.

The two False Verses and the Proof of 9:127

9/8/22

In the above exercise, let us count 9:128, 129 and see what happens?! The number of revealed verses become 3490. Let us look at the following table.

Index of Gaussian Prime	Index of Prime	Prime/Gaussian Prime
1756	3490	32531

If we do this, then we would find the verse 19:98 is the 1756th composite-numbered verse. Now let us look at the Lonely Primes (LP) and see where the indices of these lonely primes in the domain of Gaussian Primes (GP) and Twin Gaussian Primes (TGP) are. We show these in the following table.

Index of TGP	Index of GP	Index of LP	LP/GP/TG
341	2417	3490	46507

Now the keys of exposing the errors of 9:128,129 are the two indices 341 and 2417.

$$341 = 11 \times 31$$

But 1131st prime is 9127!

2417 is the 9th permutation of 2147 which is total number of the frequency of H.M. in the 7 H.M.-initialed suras 40-46. 2417 is a prime number and its index is 359 which is 19th *emirp* with the *emirp* 953. Recall 953rd composite is 1143 and;

$$1143 = 9 \times 127!$$

The Number of Initials in Chapter 2 Generate 9:127

Let us look at the 19th positional additive prime. The following tables the best way to explain it.

Index	Index of Prime + Prime	Prime
19	98 + 521	619

- **Chapter 19 has 98 verses.**
- **19 is the 8th prime and chapter 98 has 8 verses.**
- **619 is the 114th prime number and 114 is the number of chapters in the Quran.**
- **$19 \times 521 = 9899$ is the frequency of A, L, and M in chapter 2.**

The last bullet is the key to generate 9:127. Here we note that both 19 and 521 are also twin primes; remember two witnesses! The 7th individual twin prime is 19 and the 48th individual twin prime is 521.

The 748th lonely prime is 9127!

Now let us analyze 748! First we note the digital sum of 748, i.e. $7 + 4 + 8 = 19$. Furthermore, the digital sum of 9127 is; $9 + 1 + 2 + 7 = 19$. We also note that 9127 is the 19th group element is the following table of the Permutation group elements.

Index	Element	Index	Element
1	1279	13	7129
2	1297	14	7192
3	1729	15	7219
4	1792	16	7291
5	1927	17	7912
6	1972	18	7921
7	2179	19	9127
8	2197	20	9172
9	2719	21	9217
10	2791	22	9271
11	2917	23	9712
12	2971	24	9721

Now we factor 748 into its prime constituents.

$$748 = 2 \times 2 \times 11 \times 17$$

The indices of these primes are,

1157.

This number is a bi-prime and its index is 341 and we have;

341 = 11 × 31

But, 1131st prime is 9127!

Revisiting 9127 Permutation properties

9/1/22

Let us revisit the permutation group properties of 9127

Index	Element	Index	Element
1	1279	13	7129
2	1297	14	7192
3	1729	15	7219
4	1792	16	7291
5	1927	17	7912
6	1972	18	7921
7	2179	19	9127
8	2197	20	9172
9	2719	21	9217
10	2791	22	9271
11	2917	23	9712
12	2971	24	9721

We shall see that the 9th group element is directly generated from 19 and that again it generates 9:127.

First recall that the 19th tri-prime is 78 and that $19 \times 78 = 1482$ which is the frequency of A, L, M, R is chapter 13 in the Quran. However, the 78th Super Prime number is 2719. Let us go to 27:19 and note the fact that it is a verse in an initialed chapter.

3176 1708 1842 953 781 27:19 -- He then smiled and laughed at her statement and said; my Lord make me be appreciative of Your blessings that You have bestowed upon me and my parents and do righteous deeds that pleases You, and admit me into Your mercy along with Your righteous servants.

Note the underlined number is the order of the revelation of verse in the initialed chapters, 953. However, 953 is the index of composite 1143 = 9 × 127, which again points to 9:127.

The 19th "Emirp", 359

8/25/22

As we have seen the 19th "emirp" is 359 and it immediately generates 953 which is the index of composite 1143 = 9 × 127. The 19th "emirp", 359, assuming that it is written in base 19, would yield the following.

$359_{19} = 1187_{10}$

We should recall that 1187 is the 114th lonely prime and it is the index of prime number 9619. Remember chapter 96 which was the first chapter revealed has 19 verses. Also 9619 happens to be lonely prime as well and its index is the 790. 790th verse containing the word "God" from the beginning of the Quran is 9:127. We also have the following if we assume 790 is in base 19.

$790_{19} = 2698)_0$

2698 is the number of word God in the entire Quran.

We can also write the following in these cross bases formalism. Recall the 8th prime number is 19, hence, we can write the following.

$$359_{19} = 2243_8$$

2243 is the 334th Prime number. If we multiply 19 by 334 we get $19 \times 334 = 6346$ which is the total number of the verses in the Quran, including the 112 un-numbered "In the Name of God, the All Gracious, the All Merciful".

The 19th "*emirp*" 359 and its reverse 953

8/25/22

We look deeper into 953. Let us look at the following table.

Index of Twin Prime	Index of Prime	Twin Prime/ Gaussian Composite
953	1657	30853

Note, 953rd composite is $1143 = 9 \times 127$. And 1657 tell us the following.

$$1657_{19} = 9127_{10}$$

Now, we look at 953 in the domain of Gaussian Composites and Lonely Primes.

Index of Gaussian Prime	Index of Lonely Prime	Lonely Prime/ Gaussian Composite
699	953	11813

Here is what 699 tells about 9:127. We have the following mathematical facts.

$(699)_{19} = (2346)_{10}$

2346 is the number of verses from 1:1 to 19:98. We also can write the following.

$(699)_{10} = (1273)_{8}$

Recall $1273 = 19 \times 67$ is the frequency of the word God in 9:127.

9:127 and Quranic Initials

8/18/22

The 19th prime is 67 and the 67th twin prime pair is (2141, 2143). The 7th individual twin prime is 19 and $133 = 19 \times 7$. Now let us look at the following table.

Index of Individual TP	Index of GP	Index of Prime	TP/GP/ Prime
133	166	324	2143

133 in the frequency of the initial "NuN" in chapter 68 which the 29th and the last initialed chapter in the Quran. 166 is the frequency of the initials H.M. in chapter 44. Now let us look at the following.

	ح + م	ح	م
44	150	16	166

The indices of these composites are,

29	114	9	127

Again 29 initialed chapters, a total of 114 chapters and chapter 9 has 127 verses.

324 in the frequency of Ha + the frequency Meem in sura 41. Note, 324 in also the frequency of Meem in sura 43. However, the way 166 is lining up with 324 is amazing. This is because, as mentioned above, 166 is the frequency of Ha + Meem in sura 44. But, 44 is also the frequency of Ha in sura 43! This makes the frequency of Ha plus the frequency of Meem in chapter 43 to be 44 + 324 = 368.

We also note that the 324th Lonely Gaussian Prime is 7523. Let us look at the following table.

Index of Lonely GP	Index of Prime	Lonely GP/ Prime
324	953	7523

However, 953 is the "*emirp*" of the 19th *emirp* 359 and 953 is the index of composite 1143 = 9 × 127. Again telling us chapter 9 has 127 verses.

The Statute Book and 9127

8/11/22

The 19th positional additive prime is 619 which is the 114th prime number. Note 114 is the number of chapters in the Quran. Let us look at the following table.

Index	Index + Prime	Prime
19	98 + 521 =	619

From the above table we note that sura 19 has 98 verses. The product of these two numbers is;

19 × 98 = 1862

Let us now look at the following table.

Index of LGP	Index of GP	Lonely GP/ GP
1862	2577	49891

Recall chapter 25 called the "Statute Book" has 77 verses. Let us go there and examine this verse, i.e., 25:77.

2930 1468 1222 748 25:77 -- Say, my Lord would not care if it were not for your claims; however, once you reject the truth, then you will soon see the inevitable consequences.

The underlined number 748 is the key. This is the number of verses revealed in the un-initialed suras.

The 748th lonely prime is 9127.

Generators of the Quran

8/11/22

Index	Positional Additive Prime
19	98 + 521= 619

From the above table, we note that chapter 19 has 98 verses. The multiplication of 19 and 521 yields the following.

$19 \times 521 = 9899$, the number of the frequency of A, L, M in chapter 2.

The index of prime number 619 is 114, the number of chapters in the Quran.

The index of prime number is 8 and chapter 98 has 8 verses.

Recall chapter 98 is called "The Proof". Hence, we study the number 988.

$988 = 2 \times 2 \times 13 \times 19$

The indices of these prime factors are 1 1 6 8. Now we look at the number 1168. We look at the following table and we see that the 1168th Gaussian Composite (GC) is the 2346th regular prime.

Index of GC	Index of Prime	GC
1168	2346	20857

This inter-index relation reveals the number of verses from 1:1 to 19:98, which is 2346 and that the 19th permutation of 2346 is 6234, the total number of numbered verses in the Quran.

Generators of the Quran

8/4/22

We start with 19th positional additive prime.

Index	Positional Additive Prime
19	98 + 521= 619 p
25	114 + 619 = 733 p
28	130 + 733 = 863 p
30	150 + 863 = 1013 p
138	170 + 1013 = 1183 c

As we see the fifth row, 1183 is not a prime and is a composite instead. However, 1183 is the 988th composite which we discussed last week; and 1183rd composite is 1406 which is equal to 19 × 74. Remember number 19 is mentioned in sura 74 only.

Now let us study 1406 and look at all its prime factors.

1406 = 2 × 19 × 37

With indices 1 8 12.

The number 1812 has the following property. Let us look at the following table.

Index of Lonely GP	Index of GP	GP/Lonely GP
1273 = 19 × 67	1812	33647

Recall 1273 = 19 × 67 is the frequency of the word "God" in 9:127. Note, 1273 is actually generated by 67 being the 19th prime.

Generators of the Quran

7/28/22

The permutation group properties of 1279 and their relations with prime and their indices generate chapter 9 having 127 verses. Let us look at the following table.

Index	Element	Index	Element
1	1279	13	7129
2	1297	14	7192

3	1729	15	7219
4	1792	16	7291
5	1927	17	7912
6	1972	18	7921
7	2179	19	9127
8	2197	20	9172
9	2719	21	9217
10	2791	22	9271
11	2917	23	9712
12	2971	24	9721

As we have known for many years 9127 is the 19th permutation of 1279. But let us look at the 9th one, or 2719. Let us see how this number is generated and how it is telling us that 9 has 127 verses.

The index of prime number 2719 is 397 and 397 is the 19th Individual Twin Gaussian composite. Now let us go to 27:19 in the Quran.

3176 1708 1842 953 781 27:19 -- He then smiled and laughed at her statement and said, my Lord make me be appreciative of Your blessings that You have bestowed upon me and my parents and do

the righteous deeds that pleases You, and admit me into Your mercy along with Your righteous servants.

The number to note here is the order of revelation of verses in initialed chapters which is 953. The underlined number 953 is the index of composite 1143 = 9 × 127.

Generators for the initials and Sura 9
7/21/22

Here is the table of Gaussian Composites.

Index	P. Index	Gaussian Composite
1	1	2
2	3	5
“	“	“
19	40	173
“	“	“
47	98	521
“	“	“
209	422	2917

209 is the total frequencies of A + S + Q in Sura 42. Note, A.S.Q. is 42:2 (Hafs version only!). 2917 is the 11th permutation of 1279 and the 19th permutation of 1279 is 9127 and sura 9 has 127 verses. Note, 209 = 11 ×19!

We also have the following.

Index of LG Prime	Index of Prime	Prime/LG Prime
422	1254	10223

1254 is the frequency of the initials A, L, M is sura 30.

10223 is the concatenation of 102 and 23 and we know that 23rd tri-prime is 102 and 102 = 2 × 3 × 17 and the indices of these primes, namely 23, 2, 3, and 17 are 9, 1, 2, 7; reaffirming sura 9 has 127 vesres.

This also tells us that 42:2 is the correct verse number for ASQ, thereby only Hafs version of the Quran is correct.

Now let us look at the following table. We see 10223 has the following form.

Index	Tri-Prime
23	102 = 2 × 3 × 17
Index of 23	The indices of 2, 3, and 17
9	1 2 7

422 is the index of Lonely Prime 5059 and 5059 is the index of tri-prime 19798. Note the frequencies of Kaaf, Ha, Ya, Ain, Saad is 798 in chapter 19.

Generators of the Quran

7/14/22

The 114th positional partitionable composite into a prime plus its index is 963 as shown in the following table.

Index	Index + Prime = Composite
114	142 + 821 = 963

From the above table we see 142 × 19 = 2698 which is the frequency of the word "God" in the Quran.

Index	Prime	Composite
821	6311	988

Chapter 63, called the "Hypocrites" has 11 verses and chapter 98 called the "Proof" has 8 verses. The digits 8, 2, and 1 are the indices of 19, 3 and 2. These are the factors of 114, i.e., 114 = 2 × 3 × 19. A mathematical warning to the "Hypocrites".

Now let us look at the properties of 963. Best way to illustrate this is with the aid of a table. Note G and LG stand for Gaussian and Lonely Gaussian, respectively.

Index of LG Prime	Index of G Prime	Prime/LG Prime
963	1406	25391

The number $1406 = 19 \times 74$ pointing to the physical fact that sura 74 is where the number 19 is mentioned.

The 963rd twin prime pair is (75401, 75403) and the indices of these primes are (7430, 7431). Recall verse 74:30 is where the number 19 is mentioned and 74:31 is the reason for the number 19.

The 963rd individual twin prime is 31183 and this prime happens to be the 1183rd Lonely Gaussian Prime. 1183 is also the index of $1406 = 19 \times 74$ and 1183 is the 988th composite itself and we know that sura 98 called "the Proof" has 8 verses.

Generating the Initials from 19

7/7/22

We go back to the 19th Positional Additive Prime.

Index	Positional Additive Prime
19	98 + 521= 619

We show the generators with a bullet format.

- **19 has 98 verses**
- **19 × 521 = 9899, the frequency of A + L + M is chapter 2**
- **619 Is the 114th prime number, the number of chapters in the Quran**
- **619 is the index of prime 4567 with the 19th permutation of 7456 and chapter 74 where 19 is mentioned has 56 verses.**
- **19 × 98 = 1862 is the number of word God from 1:1 to 28:88.**
- **15991 is a prime and it is also a Gaussian Prime. Its index is the Gaussian prime domain is 941 and in the prime domain is 1862. 941st composite is 1131 which is the index of 9127, i.e., chapter 9 has 127 verses.**
- **The digits in 1862, i.e., 1, 8, 6 and 2 are the indices of primes 2, 19, 13 and 3. We have 19 × 13 × 3 × 2 = 1482, which is the frequency of A + L + M + R in chapter 13.**
- **The digits of 1482, i.e., 1, 4, 8 and 2 are the indices of primes 2, 7, 19 and 3. We have 19 × 7 × 3 × 2 = 798, which is the frequency of K + H + A' + Y + S in chapter 19.**

The 19th Semi-Prime Generates 9:127

6/30/22

The total number of verses, i.e., including the "Bism Allah" in the Quran is generated from the 19th semi-prime which is 55. Therefore, the concatenation of 55 and 19 is 5519 which is the index of 6346 which is the total number of verses in the Quran. Let us study 5519. We note there are 2 prime numbers in 5519, i.e., 5 and 19. The indices of these primes are 3 and 8, hence we for 5519, we have 338. Let us look at the following table.

Index of Tri-Prime	Index of Composite	Composite/Tri-Prime
338	1143	1362

1362 is the number of verses from 1:1 to 9:127. [1143 is the index of the composite 1362 and 1143 = 9 × 127, (Milan Sulc 1998)]. 1362 is also a tri-prime and its index 338 which was generated from 5519.

19, index of Prime Number 67 Generates 9:127 and 114

6/30/22

We go back to this mathematical truth.

Index	Prime	Composite
19	67	30

Chapter 67 has 30 verses.

19 × 67 = 1273 is the number of word "God" from 1:1 to 9:127.

19 × 30 = 570 is the number of frequency of A plus L plus M in chapter 32.

570th Gaussian prime is 9127.

Let us just focus on 19 and 67 and see if we can generate 114 which is the number of chapters in the Quran from these two numbers. Remember these two numbers have already given us the frequency of the word God, i.e., 1273 in 9:127.

The index of the prime number 19 is 8 and the index of the prime number 67 is 19. Hence, we have 819. A look the following table reveals the answer.

Index of Lonely Prime	Index of Gaussian Prime	Lonely Prime/Gaussian Prime
819	619	9967

Recall 619 is the 114th prime number.

19, 67 and 30 Generate 32:30 and 9:127

Let us look at the following table.

Index	Prime	Composite
19	67	30

- **Chapter 67 has 30 verses.**
- **19 × 67 = 1273 is the number of word "God" from 1:1 to 9:127.**
- **19 × 30 = 570 is the number of frequency of A plus L plus M in chapter 32.**
- **Chapter 32 has 30 verses.**
- **570th Gaussian prime is 9127.**
- **3230 = 2 × 5 × 17 × 19**

Composite	Factors			
3230	2	5	17	19
Indices	1	3	7	8

Now let us look at the concatenation of 1, 3, 7 and 8 or. The 341st tri-prime is 1378 and 341 = 11 × 31. Recall that 1131st prime is 9127.

19 Generates the Total Number of Verses

6/23/22

Let us go back to last week's findings and look at 341. Recall, we generated 341 from 19 and 30. Moreover, 341 = 11 × 31 and recall that 1131st prime is 9127.

index	Individual twin prime	Semi-prime	Tri-prime	Quad prime	Sext-prime
341	7561	1157	1378	2145	7320

From the above table, chapter 73 has 20 verses. 1820th composite is 2145 and 1820 is the total number verses with the word "God" in the Quran. Recall from the past sessions that 1, 8 and 20 do generate primes 2, 19 and 71 where we have,

$2 \times 19 \times 71 = 2698$ (the total frequency of the word God in the Quran.)

I have discussed 1157 and 1378 previously as how they generate 9127 and 3230. Milan also pointed out to me that 1157th composite is 1378.

The 341st individual twin prime number is 7561 as we see in the above table. However, 7561 is also the 475th Gaussian composite and;

$475 = 5 \times 5 \times 19$

But 5519th composite is 6346 which as I said is the total number of verses in the Quran including the un-numbered ones.

Generators of the Quran

6/16/22

In this section, we generate the number of suras, the number of verses in the un-initialed suras and the frequency of the word God in 9:127 and a lot more.

Let us look at the following table. Not, GC is the Gaussian Composite, LGC is the Lonely Gaussian Composite, LGP is the Lonely Gaussian Prime, and ITP is the Individual Twin Prime.

Index of LGC	Index of Prime	Index of ITP	Prime, ITP, LGC
114	384	148	2657

Prime 2657 is a LGC and ITP and of course a prime. Its indices generate

the number of chapters in the Quran, 114, and 384 is analyzed in the following way.

$114_{19} = 384_{10}$

And

$384 = 2 \times 4 \times 4 \times 3 \times 4$ (the number of 5 daily contact prayers)

Let us now try to analyze 148.

Index of LGP, ITP	ITP	LGP	Index + Prime = C
148	2657	3491	182 + 1091 = 1273

3491 is the number of verses in the un-initialed suras. 1273 is the frequency of the word God in 9:127.

1091 is the numerical value of Ramadan, the month in which Quran was revealed.

Note, the very first verse in the Quran, is the 148th verse revealed.

1 1 148 96 1(1) 5(12) 1:1	بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ **In the name of God, The All Gracious, The All Merciful**

1:1, the 148th Verse Revealed

6/9/22

We continue our study of 148. Let us look at each digit as the index of its corresponding prime.

Index	1	4	8
Prime	2	7	19

Hence, we have 2719. 2719 is the 397th prime, but 397 itself is the 19th Twin Gaussian Composite (TGC). We therefore can conclude that 19th TGC generates the revelation order of 1:1 which has 19 letters.

We also can multiply these prime, i.e., 2, 7, 19 and obtain the following.

$2 \times 7 \times 19 = 266$

However, 266th composite is 334 and we find the number of verses in the Quran including the un-numbered opening statements from the 19th twin TPCs.

Index of Twin TPC	1ndex of TPC	Index of TPC	Twin TPC	Twin TPC
19	333	334	19422	19428

We have;

$19 \times 334 = 6346$; Total number of verses in the Quran.

More on 2719

6/2/22

There is still more about 2719 which is derived from 148. The prime number 2719 is the index of composite 3168 which in turn is the index of composite 3683. This tells us that chapter 36 has 83 verses. Recall that chapter 36 is the 19th initialed surah in the Quran. Furthermore, 36:83 is a prime numbered verse and it is 951st such verse from the beginning of the Quran. Number 951

is a semi prime and it is the 285th such number and 285 is the total frequencies of "Ya" + "Seen" in this chapter called YaSeen.

The 19th Lonely Gaussian Composite, 389

389 is the 19th Lonely Gaussian Composite (LGC). Let us investigate the consequences of the 19th LGC via the following table.

Index of GC	Index of LGC	GC/LGC
389	247	6089

Now let us look at the following table.

Index of GP	LGC	Gaussian Prime
247	6089	3491

3491 is the number of verses in the un-initialed chapters in the Quran.

1:1, the 148th Verse Revealed

The 148th revealed verse in the Quran is the first verse in the complied version of the Quran which is the opening statement of the Quran and God introduces

Himself to the reader by two of His most beautiful names, The All Gracious and The All Merciful.

Let us look at the following table.

Index of Lonely Prime	1ndex of Prime/GP	Prime/Lonely Prime	Gaussian Prime (GP)
148	247	1567	3491

Note, 3491 is the total number of verses in the un-initialed suras in the Quran.

"Victory"; 48:29

We already saw how to generate the number of verses in the un-initialed chapters. We know it directly comes from the revelation order of the first verse in the complied version of the Quran, 148.

We also know that there are 83 un-numbered opening statements in the un-initialed chapters and then we have,

83 + 3491 = 3574

Now, let us look at the following table.

Index of Lonely Gaussian Prime	1ndex of Gaussian Prime	Gaussian Prime (GP), LGP
3574	4829	100511

Let us look at 48:29.

-Muhammad is God's messenger. And those with him are stern against the unfaithful, and compassionate amongst themselves. You see them bowing and prostrating, seeking God's bounty and His approval. Their marks are on their faces because of repeated prostration. Such is their example in the Torah. And their example in the Gospel is like a plant that grows taller and stronger, pleasing the farmers and enraging the unfaithful. God has promised the faithful who lead a righteous life, forgiveness and a generous recompense.

19th Composite, Generator of the Quran

The 19th composite is 30 and the 30th prime number is 113. We can make table to show this concept is more visually friendly method.

Index of Composite	Composite/Index of Prime	Prime	H+M Frequency in 40-46
19	30	113	19 × 113 = 2147

As we see, the frequency of H + M in chapters 40 through 46 is generated very quickly. Now we look the index 19 for 55 and 359. Let us look at the following table.

Index	Prime(index) + Composite(index) = Prime	Bi-Prime
19	277(59)+82(59)=359	55

In the above table, second column, I just want to focus on the index 59. Now we shall see how both 55 and 59 are related to the Quran. We can tabulate this concept.

Index of Individual Twin Prime	Index of Gaussian Prime	Individual twin prime/Gaussian Prime
55	59	619

Recall 619 is the 114th prime number and 114 is the number of chapters in the Quran.

Now let us look at the following.

$19 \times 59 = 1121$; total frequency of H + M in suras 40, 41, and 42.

$19 \times 55 = 1045$; total frequency of H + M in suras 41, 42, and 43.

19 the Generator of the Quran

The 19th semi-prime is 55 and the prime number 5519 is the index of 6346 which is the total number of verses including the 112 un-numbered opening statements.

Now the index of prime number 5519 is 729 and it is the 632nd prime-additive composite which is 6248.

Index of Composite	Index + Prime	Composite
632	729 + 5519	6248

Now let us look at the properties of 6248 with the following table.

Index of Individual Twin Prime	Index of Prime	Prime/Individual Twin Prime
1657	6248	62143

Now let us look at 1657. 1657 is the index of 1955 and it is readily generated from 19 and the 19th semi-prime 55. And we have,

$1657_{19} = 9127_{10}$.

Again generating 9 having 127 verses.

Now let us look at 632. We can show its properties in the following table.

Index of Lonely GP	Index of GP	Index of Prime	Prime/GP/ Lonely GP
632	941	1862	15991

- **19 × 98 = 1862 is the number of word God from 1:1 to 28:88.**
- **15991 is a prime and it is also a Gaussian Prime. Its index in the Gaussian prime domain is 941 and in the prime domain is 1862. 941st composite is 1131 which is the index of 9127, i.e., chapter 9 has 127 verses.**
- **The digits in 1862, i.e., 1, 8, 6 and 2 are the indices of primes 2, 19, 13 and 3. We have 19 × 13 × 3 × 2 = 1482, which is the frequency of A + L + M + R in chapter 13.**
- **The digits of 1482, i.e., 1, 4, 8 and 2 are the indices of primes 2, 7, 19 and 3. We have 19 × 7 × 3 × 2 = 798, which is the frequency of K + H + A' + Y + S in chapter 19.**

The 19th Lonely Gaussian Composite

The following table shows a short list of Lonely Gaussian Composite (LGC)

Index	LGC	Index	LGC
1	2	13	241
2	5	14	257
3	29	15	269
4	53	16	293
5	61	17	337
6	73	18	373
7	89	19	389
8	137	20	409
9	149	21	421
10	157	22	433
11	173	23	449
12	181	24	509

We want to see what we can generate with this. We look at each digit in

as the index of a prime. Look at the following table.

Index	Prime
3	5
8	19
9	23

Let us look at $5 \times 19 \times 23 = 2185$.

Let us look at verse 2:185.

2:185 -- The month of Ramadan is the month during which the Quran was revealed, as guidance for the people and proofs of guidance and the statute book. Therefore, whoever witnesses this month shall fast therein. And whoever is ill or on a trip, shall substitute a number of days later on. God wants you to be comfortable, He does not wish you hardship while you are completing this duty and you shall glorify God for guiding you that you may be appreciative.

341st Prime Number

The 341st prime number is 2293. But why choose 341? Here is why.

$341 = 11 \times 31$

However, 1131st prime number is 9127. We therefore correlate with the fact that chapter 9 has 127 verses. Now let us study the prime number 2293. The following table is again points to 9127.

Index of Gaussian Composite	Index of Prime	Prime/Gaussian Composite
1143	2293	20297

Look at the inter-index relation in the above table. We see that the 341st Prime which is 2293 lines up with 1143 and we have.

$1143 = 9 \times 127$.

Recall that 1143rd composite is 1362 which is the number of verses from 1:1 to 9:127.

114th Twin Prime Pair

The 114th twin prime pair is (4271, 4273). I specifically highlighted 4271 for the reasons which become evident in the following section.

4271 is the 16th permutation of 2147, the total frequency of HaMeem in all seven H.M.-initialed chapters 40-46.

Let us look at the following table.

Index	Prime	Composite
586	4271	714

There is an inherent relation between the prime and the composite in the above table.

Index	Prime
4	7
2	3
7	17
1	2

$7 \times 3 \times 17 \times 2 = 714$.

Hence, these two numbers generate each other. Their common index is 586. However, we have,

$586 = 2 \times 293$.

2293 is the 341st Prime and 341 = 11 × 31 and 1131st Prime is 9127.

The index of 2 is 1 and the index of 293 is 62 so we have 162 which is the index of prime number 953 which happens to be the index of composite 1143.

1143 = 9 × 127.

Recall from many moons ago that the TRUE position of the HaMeem of 42:1 is 4271.

The 19th Hept-Prime, 1120

The 19th Hept-Prime is 1120 and we shall see how it generates the number of word God in the Quran and generates 96:19 and 9:127. These are based on Gaussian Composite (GP) and Lonely Gaussian Composite (LGC). Let us look at the following table.

Index of GC	Index of LGC	GC/LGC
1120	790	19913

The indices of 19913, which is both a GC and LGC, are 1120 and 790, respectively.

But 790 is the number of verses with the word God in 9:127. Furthermore,

$790_{19} = 2698_{10}$

Recall 2698 is the frequency of the word God in the entire Quran. The factorized form of 2698 is,

$$2698 = 2 \times 19 \times 71$$

With indices 1, 8, 20 or 1820. This number, 1820, is the frequency of verses with the word God in the entire Quran. 790 is also the index of Lonely Prime 9619. Recall sura 96 has 19 verses.

The 114th Tri-Prime

The 114th Tri-prime is 455. A Tri-prime is a composite that can be factored out into 3 prime, i.e., $455 = 5 \times 7 \times 13$. Now we shall see how 455 generates 9127. Let us look at the following table.

Index of individual Twin Prime (ITP)	Index of Lonely Gaussian Prime (LGP)	ITP/LPG
455	473	11491

But, $473 = 11 \times 43$. Recall $1143 = 9 \times 127$. Remember, 1143rd composite is 1362 and 1362nd verse from the beginning of the Quran is 9:127.

The 114th Hept-Prime Generates 9:127

The 114th Hept-prime is 5408. A Hept-Prime is a composite with 7 prime factors, i.e., 5408 = 2 × 2 × 2 × 2 × 2 × 13 × 13. Now there is an inter-index relation which bring everything into focus. Let us look at the following table.

Index of Gaussian Prime	Index of Prime	Prime/Gaussian Prime
2719	5408	52999

So as we see that the 5408th prime number is lining up with 2719 which is the index of the Gaussian prime 52999.

Now let us go to verse 27:19.

3176 1708 1842 953 781 27:19 -- He then smiled and laughed at her statement and said; my Lord make me be appreciative of Your blessings that You have bestowed upon me and my parents and do righteous deeds that pleases You, and admit me into Your mercy along with Your righteous servants.

Note the order of the revelation of verse in the initialed suras, 953 is the index of composite 1143 = 9 × 127.

Further note, the index of prime number 2719 is 397 and 397 is the 19th Individual twin Gaussian composite.

Generators of 9127

The number 30 being the 19th composite and $19 \times 30 = 570$ where 570th Gaussian prime is 9127. The number of frequency of A, L, M in chapter 30, i.e., 1254 also plays an important role in generating 9127. Let us look at the following table. The number 1254 can be written as;

Index of Prime	Prime
1	2
2	3
54	251

The second column yields the following $2 \times 3 \times 251 = 1506$. Now let us the properties of 1506. We set up the following table.

Index of Lonely Prime	Index of Lonely Gaussian Prime	Lonely Prime/Lonely Gaussian Prime
1506	748	19001

The inter-index relation comes into play. 748th lonely prime is 9127.

More Generators of 9127

Now we make the following table from the information of the above table.

Index of Prime	Index of Gaussian Prime	Prime/Gaussian Prime
1506	760	12611

Let us look at the indices of 12611.

Index of lonely Prime/Gaussian Prime	Lonely Prime	Prime/Gaussian Prime
760	9221	12611

However, 9221 is the 1143rd prime number and $1143 = 9 \times 127$.

The 19th Prime Number

The 19th prime number is 67 and we have.

$19 \times 67 = 1273$.

The number 1273 is the frequency of the word "Allah" or God from the beginning of the Quran to 9:127.

But we have the following mathematical relation which we display in the following table.

Index of Twin Prime	Index of Gaussian Prime	Twin Prime/Gaussian Prime
764	1273	22619

The number 764 can be factored out into its prime factors.

764 = 2 × 2 × 191.

The indices of these prime factors are 1, 1, 43. Hence, we have.

1143 = 9 × 127.

Or we are back to 9:127.

9:127 Generates the Number of Initials in Sura 43

We have the following mathematical relation which we display in the following table.

Index of Twin Prime Pair	Index of Twin Gaussian Composite Pair	Twin Prime Pair/Twin Gaussian Composite Pair
764	368	55817

This is again the case of inter-index relations. Let us review 764. We can write 764 in terms of its prime factors;

764 = 2 × 2 × 191.

The indices of these prime factors are 1, 1, 43. Recall 1143 = 9 × 127. 368 is the frequency of H.M. in sura 43. Remember sura 43 is the 24th initialed sura in the Quran and 19th revealed initialed sura.

19th Lonely Prime

The 19th lonely prime is 223 and 223 is the 48th prime number. Note the following mathematical fact.

19 × 48 = 912

Note 912 is the frequency of the initials in sura 15.

Now let us look at 48th prime number and see how other parameters of the Quran are generated. Hence, we assemble the following table.

Index	Prime	TPC	Ind. TP	Tri-Prime
48	223	1452	521	195

1452 tells us that sura 14 has 52 verses. 521 times 19 is equal to 9899 which is the frequency of the initials in sura 2.

is the numerical value of the initial Kaaf HaYaAinSaad in sura 19.

---

912 also can be factored out into two different composites, i.e.,

912 = 114 × 8

Concatenation of these two composites 114 (the number of chapters in the Quran and 8 (the index of prime 19) yields 1148. Let us look at the properties of 1148 and see how we can generate some of the parameters of the Quran.

Let us look at the following table.

Index	Composite	Index + Prime = Composite
958	1148	1096 + 8803 = 9899

Sura 95, called "The Fig" has 8 verses, Sura or Chapter 109 has 6 verses. The frequency of three Arabic letters corresponding to these English letters "As + Ls + Ms" in sura 2 is 9899 = 19 × 521.

Index of Gaussian Prime	Index of Lonely Prime	Gaussian Prime/ Lonely Prime
1148	1599	20219

Sura 15 has 99 verses. Please recall that we started with 912 which is the frequency of "As + Ls + Rs" is sura 15 and we generated the number of verses in sura 15!

And finally, we note,

Index of Gaussian Prime	Index of Prime	Gaussian Prime/ Prime
1148	2286	20219

Chapter 2 has 286 verses. Remember above we generated the number of initials that is 9899 in sura 2!

912, Another Look

912, which we have been investigating is the frequencies of A + L + R in sura 15. We look at another way to factorize 912.

912 = 152 × 6.

Now, let us look at 1526. In the following table.

Index of Gaussian Prime	Index of Twin Gaussian Prime	Gaussian Prime/ Twin Gaussian Prime
1526	475	27851

475 is the revelation order of 19:1. Let us look at the prime factors of 475.

475 = 5 × 5 × 19

5519 is the index of composite 6346 which is the total number of verses in the Quran including the 112 un-numbered "BismAllah"s.

912, A Different Look

We may write the number 912 which in the sum of frequencies of A, L, and R in sura 15 in the following manner.

912 = 228 × 4

The number 2284 reveals that sura 9 has 127 verses. Let us show this generator with the help of the following table.

Index of Sequential Twin Gaussian Prime	Index of Twin Gaussian Prime Pair	Twin Gaussian Prime
2284	1143	210907

Recall that,

1143 = 9 × 127.

Note, the Twin Gaussian Prime, 210907, has its twin as 210911. However, it happens that 2284 is the index of 210907 rather than 210911. A careful

inspection of these two numbers reveals that the digital sum of 210907 is 19, i.e., 2 + 1 + 0 + 9 + 0 + 7 = 19, but not so for 210911.

912, A Different Look, Continued

As we have noted before, the number 912 which in the sum of frequencies of A, L, and R in sura 15 can be written in the following manner.

912 = 228 × 4

The number 2284 generates the frequencies of Kaaf , Ha, Ya, Ain and Saad in sura 19. Let us show this generator with the help of the following table.

Index of Gaussian Prime	Index of Prime	Prime/Gaussian Prime
1147	2284	20183

We note that 1147 which is the index of the Gaussian prime 20183 is,

798 = 114 × 7.

But we recognize that 798 = 19 × 42 is the frequencies of the sum of the usages of Kaaf, Ha, Ya, Ain and Saad in chapter 19.

19 and 67 Generate the Quran

397 is the 19th Individual Twin Gaussian composite.

Index	Indiv. TGC	Index	Indiv. TGC	Index	Indiv. TGC
1	13	8	113	15	313
2	17	9	193	16	317
3	37	10	197	17	349
4	41	11	229	18	353
5	97	12	233	19	397
6	101	13	277		
7	109	14	281		

$1273 = 19 \times 67$ needs to be checked in the Quran. Verse 12:73 is prime-numbered verse, and it is the 397th prime-numbered verse from the beginning of the Quran.

1273rd prime-numbered verse from the beginning of the Quran is 55:19 and 5519 is the index of composite 6346 which is the total number of verses in the Quran including the un-numbered "In the Name of God, the all Gracious, the all Merciful".

The 19th sequential Twin Prime Generates 9:127

The 19th sequential twin prime is 109. Note, chapter 109 is called "The Unfaithful". The 109th quad-prime is 748 which is the index of Lonely Prime 9127.

$748 = 2 \times 2 \times 11 \times 17$

The indices of these prime factors are 1 1 5 7. The number 1157 is semi-prime and its index is 341 = 11 × 31 and 1131st prime is 9127.

Natural Generation of 9:127

Index	Prime	Composite
19	67	30

Chapter 67 has 30 verses.

19 × 67 = 1273 is the number of word "God" from 1:1 to 9:127.

19 × 30 = 570 is the number of frequencies of A, L, M in chapter 32.

570th Gaussian prime is 9127.

The 67th Index + GP = Prime (570 + 9127 = 9697). However, the Index and its Gaussian Prime happen to be 570 and 9127.

Furthermore, the index of prime 9697 is 1197 and 1197 is the frequency of initials in sura 14.

The 19th Gaussian Mersenne Prime Number

We know that the exponent p, where p is a prime number, of the 19th Mersenne Prime number of the form $MP = 2^p - 1$ is 4253. This tells us that chapter 42 has 53 verses.

Now we investigate a group of complex prime number known as the Gaussian Mersenne Primes (GMP). These Primes are of the form $GMP = (1 + i)^n - 1$,

where i is an imaginary number equal to the square root of -1.
https://en.wikipedia.org/wiki/Mersenne_prime.

The exponent n for the 19th such prime is 353 and 353 is the frequency of H + M in chapter 42.

Generators of the Quran

The following table has a simple function and it is to generate Quranic parameters.

Index	Prime	Composite
19	67	30

Chapter 67 has 30 verses.

19 × 67 = 1273 is the number of word "God" from 1:1 to 9:127.

19 × 30 = 570 is the number of frequencies of A, L, M in chapter 32.

570th Gaussian prime is 9127.

However, 67 + 30 = 97 which is the 7th P(I) +C(I) = P prime number, i.e.,

67(19) + 30(19) = 97. Recall that 97 is the frequency of the initial "Saad" is chapter 7.

Note the index of prime number 97 is 25 (the frequency of Adam and Jesus in the Quran). Remember that the numerical value of "Saad" is 90 which plus 7 (sura number) also gives 97. Furthermore, 19 × 25 = 475 which is the revelation verse number in initialed chapters.

We also observe that 25 = 5 × 5 and 5519 is the index of 6346 which is the total number of verses in the Quran including the un-numbered "BismAllah"s. Recall that composite 1955's index is 1657 and;

$1657_{19} = 9127_{10}$. Again, it generates 9:127.

The 19th Chen Prime

The 19th Chen Prime (wiki) is 83 and,

19 × 83 = 1577

1577 is the index of composite 1862 and,

19 × 98 = 1862

1862 is the number of word God in 28:88. Let us look at the following table.

Index of Gaussian Prime	Index of Prime	Prime/ Gaussian Prime
941	1862	15991

However, 941st composite is 1131 which is the index of prime number 9127. Again, telling us that chapter 9 has 127 verses.

570th Chen Prime

We have the following table from many years ago.

Index	Prime	Composite
19	67	30

67 has 30 verses.

19 × 67 = 1273; 1273 is the frequency of the word God in 9:127.

19 × 30 = 570; 570 is the frequency of the initials A, L, M in chapter 32.

570th Gaussian Prime is 9127.

570th Chen Prime is 8627. Have a look at the following table.

Index of Chen Prime	Index of Twin Prime	Prime
570	368	8627

A quick check of chapter 43 reveals the frequency of H, M is 368.

114th Chen Prime

We have the following table.

Index of Chen Prime	Index of Prime	Prime/Chen Prime
114	166	983

166 is the frequency of Ha + Meem in chapter 44. The 114th composite is 150 and 150 is the frequency of Meem in sura 44. This means that the frequency of Ha in sura 44 is 166 – 150 = 16. We can then write.

	Meem	Ha	Ha + Meem
Composite	150	16	166
Index	114	9	127

More Generators of the Quran

65:8 -- And many communities opposed the command of their Lord and His messengers, consequently, We called them to account,

through ultimate mathematics, and We made them suffer, a horrendous suffering.

First a simple observation.

6 + 5 + 8 = 19.

658 is the index of composite 798 and 798 is the frequencies of K, H, Y, A', S in Sura 19. And,

658 = 2 × 7 × 47.

The index of Composite 2747 is 2346 and 2346 is the number of verses from 1:1 to 19:98. 2747 is the index of 3200 and Sura 3 has 200 verses.

The index of composite 658 is 538 and 538th non-Chen prime is 9127

619th Lonely Prime

The 619th Lonely Prime (LP) is 7541 and it is also a Gaussian Composite. We can therefore we can set up the following table,

Index	Index of LP	Index of Prime	GC/LP/Prime
473	619	956	7541

Let us look at these indices, namely, 473, 619, 956.

473 = 11 × 43; but 1143 = 9 × 127, and 9 has 127 verses.

619 is the 114th prime number and the Quran has 114 chapters.

956th composite is 1146 and chapter 114 has 6 verses.

The 19th index additive prime is 619, i.e.,

Index	Index + Prime = Prime
19	98 + 521 = 619

However, 7541 is the 521st Chen Prime.

More Generators of the Quran

The following table shows the 19th twin TPC with the indices of the each TPC.

Index of Twin TPC	Index of TPC	Index of TPC	Twin TPC	Twin TPC
19	333	334	19422	19428

- **The total number of verses in the Quran 19 × 334 = 6346**
- **$333_{19} = 1143_{10} = 9 \times 127$.**
- **Note, 3 + 3 + 3 + 3 +3 +4 = 19.**

1 + 9 + 4 +2 +2 + 1 + 9 + 4 +2 + 8 = 42.

- **19 × 42 =798**
- **Note, 798 is the frequency of K.H.Y.A.S. in chapter 19**

- **Digital sum of 19422 is 18 and the digital sum of 19428 is 24 and 1824 = 96 × 19; and 96 has 19 verses.**

Now let us look at 333 and 334 as the indices of Non-Chen Primes. The 333rd Non-Chen Prime is 5693 and it is the 368th Gaussian Composite. 368 is the frequency of the initials H.M. in chapter 43. 5693 is the 473rd Lonely Prime and,

473 = 11 × 43

1143 = 9 × 127; Chapter 9 has 127 verses.

The 334th non-Chen prime is 5717 and it is the 753rd prime. 753 is the 619th composite and 619 is the 114th prime.

Generate the Number of Verses

I am going to generate the number of verses in the Quran from Gaussian primes, specifically "Index Additive Gaussian Primes". A *Index Additive Gaussian Prime* is a Gaussian prime which is the sum of a Gaussian Prime plus its index. The 19th such Gaussian Prime is;

Index	Index of GP	GP	Index + GP = GP

19	360	5351	5711

However, 5711 is the 475th lonely prime and,

$475 = 5 \times 5 \times 19$

But, 5519th composite is 6346 which as I said many times before is the total number of verses in the Quran including the un-numbered ones.

Verse 55:19 in the Quran is 1273rd prime-numbered verse from the beginning of the Quran and $1273 = 19 \times 67$ is the number of word God from the beginning of the Quran to 9:127.

The 475th revealed verse in the initialed suras is 19:1 and $475 = 25 \times 19$. But recall that 25 is the frequency of the mention of Jesus and Adam and that the 19th frequency of both Jesus and Adam is in chapter 19. They are in verses 19:34 and 19:58, respectively. Note, the sum of the verse numbers 34 + 58 = 92. And verse 19:92 where one finds the 19th frequency of the word الرَّحْمَنِ or The All Gracious is mentioned.

19:92 -- It is not befitting for The All Gracious to beget a son!

Note, 92 is the numerical value of Muhammad.

The 19th Sequential Twin TPC

The 19th sequential Twin TPC is 3468. The 3468th Gaussian prime is 69467. This is the 941st Sequential Twin Gaussian Prime. But 941st composite is 1131 which in turn is the index of prime number 9127. This, again, generates chapter 9 having 127 verses.

The 19th Semi-prime is 55

The 19th semi-prime is 55 and $1045 = 19 \times 55$. The 1045th Additive Prime is 19913 and the 19913 is the 790th Lonely Gaussian Prime. But 790th lonely prime is 9619 and 96 has 19 verses. Reminding you also that 790th verse containing the word God is 9:127 and $(790)_{19} = (2698)_{10}$. 2698 is the number of times the word God has been mentioned in the Quran.

The 19th Chen Prime 83

- **The 19th Chen Prime is 83 and 83rd composite is 114, and 114th is the number of suras in the Quran.**
- **The 114th composite is 150 and 150 is the 19th quad prime.**
- **The 150th composite is 195 and 195 is the numerical value of K (20) + Ha (5) + Y (10) + Ayn (70) + Saad (90) in sura 19.**

- **150 is the numerical value of the Jesus and the 19th frequency of Jesus is mentioned in sura 19 verse 34.**
- **34 is the number of times Mary is mentioned in the Quran.**
- **The 195th composite is 249 and the 249th Non-Chen Prime is 4253. Recall sura 42 has 53 verses and that 4253 is the exponent of the 19th Mersenne Prime.**

The 19th Quad Prime

- **The 19th quad-prime is 150.**
- **The 114th composite is 150.**
- **The 150th composite is 195 and 195 is the numerical value of K (20) + Ha (5) + Y (10) + Ayn (70) + Saad (90) in sura 19.**
- **The 195th composite is 249 and the 249th Non-Chen Prime is 4253. Recall sura 42 has 53 verses and that 4253 is the exponent of the 19th Mersenne Prime.**
- **The 249th Lonely Gaussian Prime is 5683 which is the 748th Prime.**
- **The 748th Lonely Prime is 9127.**

The 19th Semi-prime

- **The 19th semi-prime is 55. Let us study 1955.**
- **The Index of Composite 1955 is 1657**
- **$1657_{19} = 9127_{10}$. Again, it generates 9:127.**
- **1955 is the index of Quint-prime 19521.**
- **Recall, 19 and 521 are the prime factors of 9899; or, 9899 = 19 × 521.**
- **Note, 9899 is the frequency of A + L + M in sura 2 which is the first initialed sura in the Quran.**
- **The prime factors of 1955 are,**
- **1955 = 5 × 17 × 23 with indices 3, 7, 9.**

- **The 379th lonely Gaussian prime is 9127, again generating 9:127.**
- **The 379th lonely Gaussian Composite is 9221, which is the 1143rd Prime.**
- **1143 = 9 × 127, again generating 9:127.**
- **The 55th Emirp is 1229.**
- **The Emirp of 1229 is 9221.**
- **9221 is the 1143rd prime.**
- **1143 = 9 × 127, again generating 9:127**

The 19th Sequential Twin Prime

- **The 19th Sequential Twin Prime is 109**

- **The 109th Chen Prime is 941**

- **The 941st Composite is 1131**

- **The 1131st Prime is 9127**

The 19th Quad-prime

- **The 19th quad-prime is 150**
- **The 114th composite is 150.**
- **The 150th composite is 195.**
- **195 is the numerical value of K (20) + Ha (5) + Y (10) + Ayn (70) + Saad (90) in sura 19.**
- **Primes of the type where p and $p + 2 = p_1 \times p_2$**
- **The 195th such prime is 3491.**
- **3491 is the number of verses in the un-initialed suras.**

The 19th Lonely Gaussian Composite

- **The 19th Lonely Gaussian Composite (LGC) is 389**
- **The 389th Individual Twin Prime is 9343**
- **The 1157th Prime is 9343**
- **The 195th Twin prime Pair is (9341,9343)**
- **195 is the numerical value of K (20) + Ha (5) + Y (10) + Ayn (70) + Saad (90) in sura 19**

- **1157 is the 341st = 11 × 31 Semi-Prime**
- **1131st Prime is 9127**
- **1, 1, 5, and 7 are the indices of primes 2, 2, 11, and 17**
- **2 × 2 × 11 × 17 = 748**
- **748th Lonely Prime is 9127**

570th Gaussian Prime and Gaussian Composite

Index	Prime	Composite
19	67	30

- **Chapter 67 has 30 verses.**
- **19 × 67 = 1273 is the number of word "God" from 1:1 to 9:127**
- **19 × 30 = 570 is the number of frequencies of A, L, M in chapter 32**
- **570th Gaussian Prime (GP) is 9127**

The 570th Gaussian Composite (GC) is 9241. Look at the following table.

Index of GP & GC	GP	GC
570	9127	9241

Now let us look at the relation between 9241 and 9127.

9241 – 9127 = 114 the number of chapters in the Quran

Generating the Quran

Let us look at the following findings and look at 341. Number 341 = 11 × 31 and recall that 1131st prime is 9127.

index	Individual twin prime	Semi-prime	Tri-prime	Quad prime	Sext-prime
341	7561	1157	1378	2145	7320

From the above table, chapter 73 has 20 verses. 1820th composite is 2145 and 1820 is the total number verses with the word "God" in the Quran. Recall from the past sessions that 1, 8 and 20 do generate primes 2, 19 and 71 where we have,

2 × 19 × 71 = 2698 (the total frequency of the word God in the Quran.)

I have discussed 1157 and 1378 previously as how they generate 9127 and 3230. Later, Milan pointed out that 1157th composite is 1378.

The 341st individual twin prime number is 7561 as we see in the above table. However, 7561 is also the 475th Gaussian composite and

475 = 5 × 5 × 19

But 5519th composite is 6346 which as I said is the total number of verses in the Quran including the un-numbered ones.

353 is the exponent of the 19th Gaussian Mersenne Prime. The 353rd prime where $P + 2 = P_1 \times P_2$ is also 7561 where we observe $7 + 5 + 6 + 1 = 19$. Recall 353 is the frequency of Haa + Meem in chapter 42. Note, the

$341^{st} = 11 \times 31$ where 1131st prime 9127. Hence, 353, the frequency of Haa + Meem in chapter 42 is directly linked to 9:127 and generates it.

The 19th sequential Twin Prime Generates 9:127, Connection to TaSeenMeem in Chapter 28

The 19th sequential twin prime is 109. Note, chapter 109 is called "The Unfaithful". The 109th quad-prime is 748 which is the index of Lonely Prime 9127.

$748 = 2 \times 2 \times 11 \times 17$

The indices of these prime factors are 1 1 5 7. The number 1157 is a semi-prime and its index is $341 = 11 \times 31$ and 1131st prime is 9127.

Recall that the 195th Twin Prime is (9341, 9343), and 195 is the numerical value of KaafHaYaAynSaad in chapter 19.

The 1157th prime number is 9343 and 9343 is the 581st Gaussian Prime.

581 is the frequencies of the usage of Ta + Seen + Meem in chapter 28.

The 19th Gaussian Mersenne Prime Number

We know that the exponent p, where p is a prime number, of the 19th Mersenne Prime number of the form $MP = 2^p - 1$ is 4253. This tells us that chapter 42 has 53 verses.

Now we investigate a group of complex prime number known as the Gaussian Mersenne Primes (GMP). These Primes are of the form $GMP = (1 + i)^n - 1$, where i is an imaginary number equal to the square root of -1.
https://en.wikipedia.org/wiki/Mersenne_prime.

The exponent n for the 19th such prime is 353 and 353 is the frequency of H + M in chapter 42.

The 19th Mersenne prime has 1281 digits and it starts with

19079700……91

As Mahmoud Abib reminded me 797 is the 139th prime number. However, recall that 139 is the number of Arabic letters in chapter 1 of the Quran called "The Opener". It turns out that, as I discussed previously, 139 is the 19th "Additive prime (recall additive prime is a prime that the sum of its digits add up to a prime, i.e., 1 + 3 + 9 = 13).

797 tells us that sura 7 has 97 initial "Saad". 797 is also the 38th Lonely Gaussian Composite. Note Sura 38 is called "Saad". Note these numbers from verse 10:16.

1378 708 2131 1131 797(1281), 355(560) 10:16

Say, had God willed, I would have never recited it to you, and you would have never understood it, although I had indeed spent a lifetime among you prior to this. Do you not think?

The 19th 6-Prime Controls the number of verses in sura 9

The 19th 6-prime is 560 and it is there to generate the fact that chapter 9 in the Quran has 127 verses. A 6-prime is a composite that can be factored out into six (6) primes. In this case, we have;

$$560 = 2 \times 2 \times 2 \times 2 \times 5 \times 7 = 16 \times 5 \times 7$$

Now let us look into Prime-Index Mathematics and we shall find a huge inter-indexal relation which boggles the mind.

Index of Lonely GP	Index of Prime	Prime, Lonely GP
560	1657	14051

Note the inter-indexal relation the 560th Lonely Gaussian Prime is the 1657th regular prime and we have,

$$1657_{19} = 9127_{10}.$$

Note here the digital sum of 1657_{19} is 10_{19}. The digital sum of 9127 is 19 in base 10 and the 10th initialed sura is 19.

Again, one can see that the structure of the Quran is with its generator which is 19-based Ultimate Mathematics.

74:30 – Over it is 19

After all this Milan called and when told him about 560, he sent me this email.

5:60 is the 729th numbered verse, leading to 5519 and 6346.

Milan looked at verse 5:60 which is the 729th numbered verse from the beginning of the Quran. But the 729th prime is 5519 and 5519th composite is 6346 which is the total number of verses in the Quran including the 112 un-numbered "Bisme Allah"s.

19th Semi-prime 55 Generates key parameters of the Quran.

The 19th semi-prime is 55. There are only 2 ways to concatenate these two numbers: either 5519 or 1955. First, we ha

Index	Composite
5519	6346

Note, from the above table 5519 by the virtue of being the index of the composite 6346 generates the total number of verses in the Quran, including the un-numbered "Bism Allah"s. Now to the 1955.

Index	Composite
1657	1955

Here $1657_{19} = 9127_{10}$. Again, it generates 9:127.

Furthermore,

Index	Quint-prime
1955	19521

Recall, 19 and 521 are the prime factors of 9899; or, 9899 = 19 × 521. Note, 9899 is the frequency of A + L + M in sura 2 which is the first initialed sura in the Quran.

The prime factors of 1955 are,

1955 = 5 × 17 × 23 with indices 3 7 9.

The 379th lonely Gaussian prime is 9127, again generating 9:127.

Index	Composite
1955	2298

The 2298th Lonely Gaussian Prime is 62731. However, 62731 is also the 4635th Lonely Prime and Sura 46 has 35 verses. Note that 19 × 55 = 1045 which is the frequency of H.M. in suras 41 + 42 + 43.

Sura 23, "The Faithful"

Sura 23 has 118 verses and 118 = 2 × 59; hence we have,

23 2 59. The indices of these primes are 9 1 17.

The 9117 is the index of prime number 94541 and

94541 is the 3425 Lonely Gaussian Composite and this is the 9th permutation of 4253, the exponent of the 19th prime. 3425 is the index of composite 3975 and sura 39 has 75 verses. Note chapter 39 is the 19th un-initialed sura in the Quran.

The 19th Revealed Initialed Chapter

The 19th revealed initialed sura was sura 43 and it is the 24th initialed sura in the compiled form of the Quran. Sura 43 has 89 verses and both the sura number and the number of verses are prime numbers with the indices of 14 and 24, respectively. The concatenation of these two indices yields 1424 and we have,

Index	Prime	Composite
1199	9721	1424

As we see the prime number 9721 and the composite number 1424 have the same index, namely 1199. Composite 1199 is a semi-prime and it is 353rd semi-prime. Recall 353 is the exponent of the 19th Gaussian Mersenne Prime and 353 is the frequency of H + M in sura 42. Note, the following table shows the permutation group of 1279.

We see that the 19th and the 24th elements are 9127 and 9721. We have,

19 × 24 = 456

With index of 368 and it is the frequency H + M in sura 43.

Index	Element	Index	Element
1	1279	13	7129
2	1297	14	7192
3	1729	15	7219
4	1792	16	7291
5	1927	17	7912
6	1972	18	7921
7	2179	19	9127
8	2197	20	9172
9	2719	21	9217
10	2791	22	9271
11	2917	23	9712

12	2971	24	9721

The 19th Revealed Initialed Chapter

From the above table, we see that the 19th and the 24th group elements are 9127 and 9721, respectively. The sum of these two group elements is,

$$9127 + 9721 = 18848.$$

Note 18848 is the sept-prime, i.e., has 7 prime factors and it is the 473rd such sept-prime. However,

$$473 = 11 \times 43.$$

And,

$$1143 = 9 \times 127$$

Recall that,

$$4389 + 4738 = 9127$$

Sura 19 has 98 verses

Chapter 19 has 98 verses and if look at the indices of prime number 19 and the composite number 98 we obtain 8 and 72 which when concatenated generates 872. The 872nd Lonely Gaussian Prime is 22619 and we have the following table,

Index of Individual Twin Prime	Index of Gaussian Prime	Twin Prime/Gaussian Prime
764	1273	22619

The 19th prime number is 67 and we have;

$$19 \times 67 = 1273.$$

The number 1273 is the frequency of the word "Allah" or God from the beginning of the Quran to 9:127.

The number 764 can be factored out into its prime factors;

$$764 = 2 \times 2 \times 191.$$

The indices of these prime factors are 1, 1, 43. Hence, we have;

$$1143 = 9 \times 127.$$

Or we are back to 9:127.

Sura Number - Number of Verses Relations

Sura 29 has 69 verses. The index of the prime number 29 is 10 and the index of composite 69 is 49. We therefore have 1049. Sura 104 has 9 verses. 1049 is the index of composite 1254 and 1254 is the frequency of Alif + Lam + Ra in chapter 12.

The 1049th semi-prime is 3791 and the 3791st composite is 4389 and sura 43 has 89 verses.

Sura 30 has 60 verses. The index of composite 30 is 19 and the index of composite 60 is 42. We have,

$19 \times 42 = 798.$

798 is the frequency of Kaaf + Ha + Ya + Ain + Saad in sura 19.

The index of semi-prime 1942 is 560.

The 19th 6-prime is 560 and it is there to generate the fact that chapter 9 in the Quran has 127 verses. A 6-prime is a composite that can be factored out into six (6) primes. In this case, we have;

$560 = 2 \times 2 \times 2 \times 2 \times 5 \times 7.$

The above equation can be written as,

$560 = 16 \times 5 \times 7.$

And,

$1657_{19} = 9127_{10}.$

Now let us look into this further and we shall find a huge inter-indexal relation that boggles the mind.

Index of Lonely GP	Index of Prime	Prime, Lonely GP
560	1657	14051

Note the inter-indexal relation the 560th Lonely Gaussian Prime is the 1657th regular prime and we have

$1657_{19} = 9127_{10}.$

Again one can see that the structure of the Quran always generates sura 9 with 127 verses.

The 114th Generates 9:127

The total number of chapters, in the Quran is 114. We analyze 114.

$114 = 3 \times 38$

We therefore have 338.

Let us look at the following table

Index of Tri-Prime	Index of Composite	Composite/Tri-Prime
338	1143	1362

As we see in the above table,1362 is a tri-prime and its index 338. 1362 is the number of verses from 1:1 to 9:127. Recall 1143 is the index of the composite 1362 and $1143 = 9 \times 127$, (Milan Sulc 1998).

Further study of $114 = 3 \times 38$ reveals that we can also express

$114 = 3 \times 38 = 38 \times 3$

Now let us look at 383. We see that 383 is the index of composite 475. Note that 475 is the position of verse 19:1 in the order of revelation verses in the initialed suras. Furthermore,

$475 = 5 \times 5 \times 19$.

5519 is the index of 6346 and that is the total number of verses in the Quran. Verse 55:19 is the 1273rd prime-numbered verse from the beginning of the Quran. Recall $1273 = 19 \times 67$ is the frequency of the word "God" from 1:1 to 9:127.

The 19th Index Additive Prime

The 19th index additive prime is 619 and 619 is the 114th prime number.

The 619th composite 753 and if we concatenate 19 and 753, we obtain 19753 which is the 338th twin prime pair or the 675th individual twin prime.

The 675th composite is 817 and 817 if the frequencies of A + L + M in sura 31.

19, 67 and 30 Generate 32:30, 9:127, 570 and 1672

Let us look at the following table.

Index	Prime	Composite
19	67	30

- Chapter 67 has 30 verses.
- $19 \times 67 = 1273$ is the number of word "God" from 1:1 to 9:127.
- $19 \times 30 = 570$ is the number of frequency of A plus L plus M in chapter 32.
- Chapter 32 has 30 verses.
- 570th Gaussian prime is 9127.
- 570 Lonely Gaussian Composite is 14221.
- 14221 is the 1672nd Prime number.
- 1672 is the frequency of A plus L plus M in chapter 29.

The 19th Initialed Sura in the Quran

The 19th initialed sura in the Quran is 36. Now we look at the exponent of the 36th Mersenne Prime.

- The exponent of the 36th Mersenne prime is 2976221.
- 2976221 is the 173653rd Lonely Prime
- $173653 = 211 \times 823$
- The indices of prime numbers 211 and 823 are 47 and 143.
- 47143 is an Additive Prime and its index is 2143.

The 619th prime-numbered verse from the beginning of the Quran is 21:43.

But we have the following table for the mathematical properties of 2143.

Index of Ind. TP	Index of GP	Index of Prime	GP/TP/Prime
133	166	324	2143

- **133 is the frequency of NuN in sura 68.**
- **166 is the frequency of H + M in sura 44.**
- **324 in the frequency of H + M in sura 41.**
- **324 is also the frequency of M in sura 43.**
- **Note 166 is lining up with 324 is amazing.**
- **As mentioned above, 166 is the frequency of H + M in sura 44.**
- **But 44 is also the frequency of H in sura 43!**
- **This makes the H + M in sura 43 to be 44 + 324 = 368 which is the frequency of H + M in sura 43.**
- **The importance of 133 should also be added in a further role, because 133 = 7 × 19 and there are in fact 7 HM – initialed suras!**

Recall that 21:43 is the 619th prime-numbered verse in the Quran and 619 is the 114th prime number and that 114th composite 150. But 150 is the frequency of M in sura 44. This leads to the fact that;

Sura #	Frequency of M	Frequency of H	Frequency of H + M
Comp 44	150	16	166
Index 29	114	9	127

Referring to 29 initialed suras, 114 total suras, and 9 has 127 verses.

We further have the Quranic revelation order:

10:28 -- 2143 1143.

But, 1143 = 9 × 127. Also recall that 1028 signifies the fact that 102 has 8 verses.

2143 is also the 67th twin prime pair and 67 is the 19th prime number. Also the 67th tri-prime is 279 which is frequency of TaHaa in sura 20.

We also note that the 324th prime is 2143 and the 324th quad prime is 2044.

Or tabulating this, we have,

Index of prime and Quad-Prime	Prime	Quad-Prime
324	2143	2044

But 2044 is the revelation order of the word God in 59:24.

The index of 5924 is 5145 and,

5145 = 3 × 7 × 7 × 5 × 7

With indices 2, 4, 4, 3, 4. The five daily contact prayers.

19, 67 and 30 Generate 32:30, 9:127, 570, 1672, 6346, 3373, and 4253

Let us look at the following table.

Index	Prime	Composite
19	67	30

- **Chapter 67 has 30 verses.**
- **19 × 67 = 1273 is the number of word "God" from 1:1 to 9:127.**
- **19 × 30 = 570 is the number of frequencies of A plus L plus M in chapter 32.**
- **Chapter 32 has 30 verses.**
- **570th Gaussian prime is 9127.**
- **570th Lonely Gaussian Composite is 14221.**
- **14221 is the 1672nd Prime number.**
- **1672 is the frequency of A plus L plus M in chapter 29.**
- **----------**
- **14221 is the 1147th Lonely Prime.**
- **338th Semi Prime is 1147.**
- **338th Tri-Prime is 1362 which is the number of verses from 1:1 to 9:127.**
- **The digits of 338 are the indices of primes 5, 5, and 19.**
- **5519 is the index of composite 6346 which is the total number of verses in the Quran.**
- **The digits of 1147 are the indices of primes 2, 2, 7, and 17.**

- $2 \times 2 \times 7 \times 17 = 476$
- 476th prime is 3373 and sura 33 has 73 verses.
- 476th composite is 583.
- 583rd prime is 4253 and sura 42 has 53 verses. Note, 4253 is the exponent of the 19th Mersenne Prime.
- 476 is the 384th composite.
- $384_{10} = 114_{19}$
- $384 = 2 \times 4 \times 4 \times 3 \times 4$. The five daily contact prayers.

The 19th Tri-prime

Prime numbers and their indices "generate" the Quran. This idea, by God's grace, has taken shape and is providing a "blind" analysis to generate various parameters of the Quran, i.e. number of verses in each sura and revelation and compilation order of the sura and the frequency of usage of the Quranic initials.
Here, again, I bring you an example.

The 19th tri-prime is 78 and let us look at the following table.

Index	Tri-prime	Operation
19	78	19 × 78 (multiplication)
19	78	1978 (concatenation)

First the multiplication operation yields $19 \times 78 = 1482$. 1482 is the frequency of A, L, M, R. in sura 13. Note, the following table and see what we can learn from 13 and why 13?

Table of integers mentioned in the Quran in ascending order

Index	Integer
1	1
2	2
3	3
4	4
5	5
6	6
7	7
8	8
9	9
10	10
11	11
12	12
13	19

From this table we find that the 13th integer in the Quran is number 19. Now let us see again how the number of initials in sura 13 generates the number of initials in sura 19?

Index	Prime
1	2
4	7
8	19
2	3

$$2 \times 7 \times 19 \times 3 = 798$$

- **798 is the frequency of K, H, Y, A', S in sura 19.**
- **The index of composite 798 is 658 and $658 = 2 \times 7 \times 47$.**
- **Note here at a very simple level we have $6 + 5 + 8 = 19$.**
- **The index of Composite 2747 is 2346 and 2346 is the number of verses from 1:1 to 19:98.**
- **But the index of composite 2346 is also 1998, and sura 19 has 98 verses (Milan Sulc, private comm).**
- **2747 is the index of composite 3200 and sura 3 has 200 verses.**
- **The 19th permutation of 2346 is 6234 and this is the total number of numbered verses in the Quran.**
- **The difference between the 19th and 1st permutations, i.e. $6234 - 2346 = 3888$ and sura 38 has 88 verses.**
- **$2346 = 23 \times 2 \times 3 \times 17$ with indices 9, 1, 2, 7 and sura 9 has 127 verses. Note, the reason behind writing the prime factors of 2346, namely 23, 2, 3, 17 in this specific order is because 9127 is the 19th permutation of 1279, and thus it generates 9:127.**

Now recall we had the number 2747 that generated all these Quranic parameters. Look at the following table and this also can be generated from the following inter-index relation.

Index of Lonely GP	Index of GP	GP, Lonely GP

1978 (concatenation)	2747	53719

These are relations of primes and their indices which we are learning only through The All Gracious teaching of the Quran (55:1,2).

Here to emphasize the gravity of this statement the count of the prime-numbered verses is in the last verse of sura called "The Hypocrites" is to generate the number of suras in the Quran, i.e., 114 and go back to the base of the Quran mathematics which is the number 19.

Let us look at the 1359th prime number and we find out that it is 11243. But 11243 happen to be a twin Gaussian prime and it is 114th such prime pairs. The number 11243 is also the 227th individual twin Gaussian prime and 227 is the 19th individual twin Gaussian prime.

This adds to the gravity of the verse 19:92, where the 19th frequency of the word "The All Gracious" is mentioned.

2340 1321 1359 566 19:92 -- It is not befitting for The All Gracious to beget a son!

Note, here that 1359 in this verse is the count of verses in the Quran in the order of revelation.

- **$42 \times 19 = 798$**
- **798 is the frequency of initials in Chapter 19.**
- **3:59 -- Surely, the example of Jesus as far as God is concerned is the same as Adam. He created him from clay and said to it, be and it then became.**

The 19th Gaussian Mersenne Prime Number

We know that the exponent p, where p is a prime number, of the 19th Mersenne Prime number of the form $MP = 2^p - 1$ is 4253. This tells us that chapter 42 has 53 verses.

Now we investigate a group of complex prime number known as Gaussian Mersenne Primes (GMP). These Primes are of the form $GMP = (1 + i)^n - 1$, where i is an imaginary number equal to the square root of -1.

- **Hence, the exponent of the 19th Gaussian Mersenne Prime or the number of H + M in chapter 42 generates the number of chapters in the Quran, i.e., 114.**
- **----------**
- **5437 is the 718th prime number.**
